Introduction

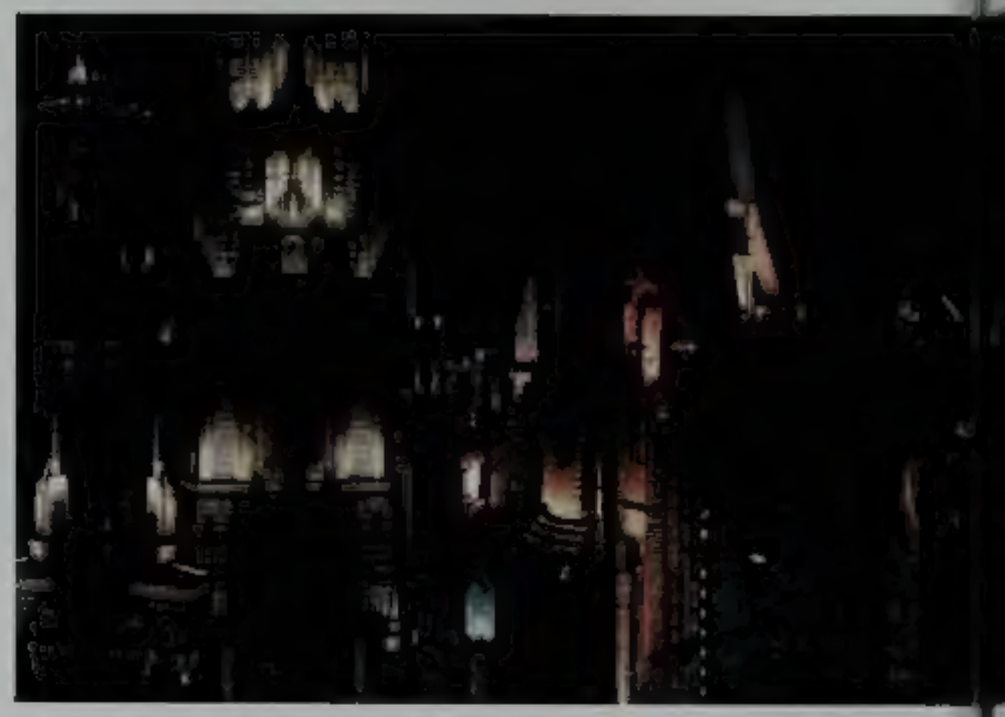
In a time of instability, the galaxy stands on the brink of rupture as powerful forces threaten to tear the Republic apart. The small numbers of peacekeeping Jedi cannot quell outright rebellion, and the great commercial powers are increasingly lured by the temptations of greed. Disruptive changes are at hand and the lines between good and evil are becoming unclear. Amid these epochal events, the galaxy's fate will turn upon the choices of only a few individuals, whose destinies are clouded. The Jedi have already lost a great leader with the defection of Count Dooku—will they now be forced to engage in the first full-scale war since the inception of the Republic? Where lies the path of honor in this uncertain time? When the valiant must choose between love and duty, peace and war, danger waits in every breath.

Trace in these pages the faces of legend, the shadows of inner turmoil, and the instruments of fate as one by one the final elements of a terrible destiny unfold.

JEDI HOLOCRON

The Growing Darkness

LONG AGO, a prophesy foretold the coming of an individual who would "bring balance to the Force," ushering in a new era of peace following one of great instability. With the Separatist crisis, the future of the great Galactic Republic is clouded with uncertainty and the peace-keeping Jedi are too few to hold together an entire galaxy. In this age, the Sith have reappeared, their evil hidden perhaps in the heart of liberty's citadel—and while the prophecy is looked upon anew, many of the galaxy's denizens have no choice but to fend for themselves.



Beyond the vision of the Jedi Knights, somewhere within the darkness, the greatest master of evil ever to use Sith power bides his time. As his strength grows, his plans begin to shape the course of the galaxy, and his snares await the unsuspecting.

A Time of Change

Below the spires of Coruscant where the Jedi High Council and the Senate debate how to resolve the Separatist crisis, ordinary people struggle through a period of growing unrest. Ancient patterns are in upheaval and vast populations are on the move. In such a time, individuals must learn self-reliance and trust in what they can carry.

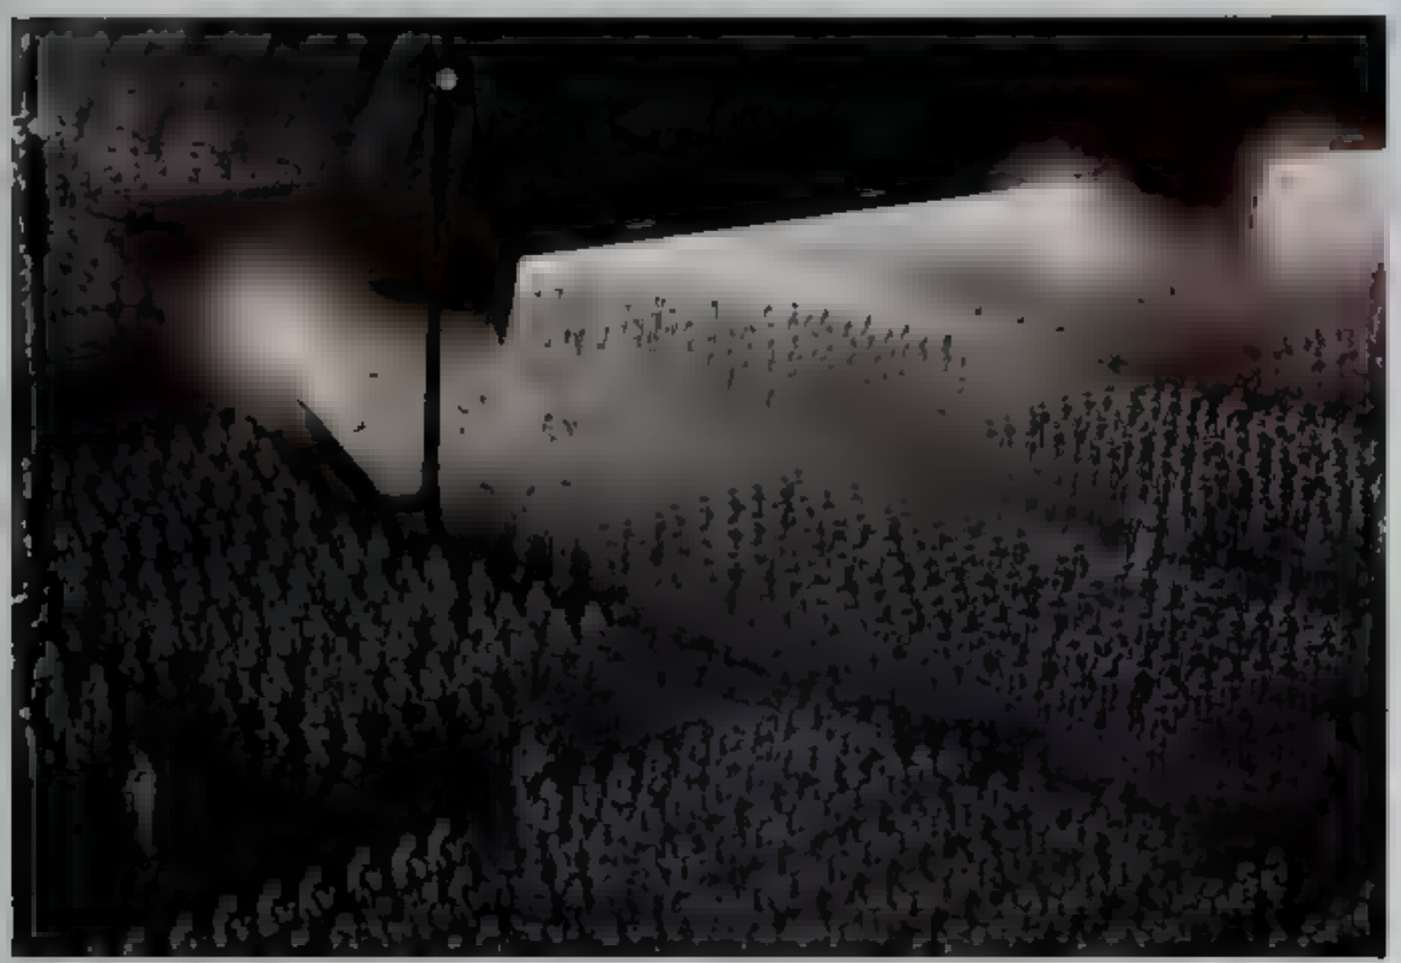
Hidden Demons

Anakin Skywalker's fate has made him a Jedi and brought him to the center of events at the galactic capital. Senior Council members suspect he is the Chosen One. But like Coruscant itself, Anakin contends with inner demons against which an ancient prophecy seems little help.



Squad of clone troopers

Since its inception, the Republic has been protected by its system of law rather than by the force of armies. But the law is only as strong as its people, and when their vigilance fades, armies may regain the upper hand.

Refugees

Anakin Skywalker and the woman he is protecting flee Coruscant in disguise, but they cannot hide from the Sith. In the time of greatest crisis, they are caught within the plans of the powerful, and like all galactic refugees, find they must rely on their inner resources.

Senator Padmé Amidala

Severe hairstyle conforms to diplomatic etiquette

Neckband is gift from Naboo Council

AS ELECTED QUEEN of Naboo, Padmé Amidala won the lasting devotion of her people by showing extraordinary strength of character during the Trade Federation invasion. On the expiration of her second and final term of office, she yielded her authority in spite of popular demand for a change in the law that would have allowed her to rule longer. She was soon elected Senator to represent the 36 Naboo regional star systems; Padmé now travels widely to build support for her causes, returning to the galactic capital of Coruscant when necessary.

Senator Amidala's retinue returns to Coruscant in the sleek Naboo Cruiser to speak against a vote on the Military Creation Act. Padmé lands amidst high tensions and an invisible web of intrigue.

Like the Naboo Queen, Padmé is served and protected in vulnerable situations by loyal handmaidens who can act as decoys, assuming Padmé's identity, appearance, and dress.

For security, Padmé sometimes travels disguised as a Naboo starfighter pilot. Other planetary Senators would never condescend to yield the trappings of their status, so the simple ruse is effective.

Senatorial Dress

Padmé dresses with decorum when speaking in the Senate on important issues. A tireless champion of peace and freedom, she has worked for years against a much-debated proposal to create a great army of the Republic, which she believes might be the catalyst for war.

Padmé's apartment

Senatorial Accomodation

While on Coruscant, Padmé and her retinue reside in quarters atop one of the ancient skyscrapers. Living in anything less than a penthouse would diminish Padmé's standing on the status-obsessed world and impede her diplomatic efforts. While the quarters are comfortable, Padmé loathes Coruscant's gray, artificial environment.

Padme's modest rooms do not have the fortress like security systems used by more sophisticated politicians. The Senator sleeps exposed to many unseen dangers.

UNTIMELY RETREAT

It takes two assassination attempts to convince Padmé to leave Coruscant for the safety of Naboo. Her retreat is a bitter one, for she will likely be absent during the vote on the army proposal and flight is alien to her character.

Supreme Chancellor Palpatine

PALPATINE IS CAREFUL TO present himself as a mild-mannered servant of the public good, avoiding ostentation and ever protesting the limits of his abilities. Palpatine ascended to office amid mass frustration with the previous Supreme Chancellor—but there is increasing evidence that Palpatine himself quietly built much of this opinion behind the scenes. It also seems that a pattern may be emerging in Palpatine's work as Supreme Chancellor: Always citing the best interests of the Republic, he has consistently increased his own power, from legal authority to his institution of the Chancellor's Red Guard, who now attend every committee meeting. For some, his true intentions remain unclear.

Sleeves of ancient design

Subdued color and simple style convey gravity without pompous exhibitionism

Security Innovator

The Supreme Chancellor has placed the new Red Guard under his direct authority, while a Senatorial committee oversees the old Blue Guard. Palpatine calls this an efficient streamlining of cumbersome bureaucracy. Objectors have called it an illegal personal bodyguard, but such talk runs the risk of violating Palpatine's new security laws.

Blue Guard

Although he prefers to avoid ostentation, Palpatine heeds the tradition for high political officials to maintain impressive audience chambers. During meetings, the large, scenic window reminds those involved that their decisions have wide repercussions.

SEAT OF OFFICE

Palpatine has bowed to the concerns of his aides by accepting a special chair of office that affords him secret shielding and cunning protection. This chair also provides direct, secure communication with Palpatine's aides and with the Red Guard.

The Red Guard

Palpatine has kept the details of the Red Guard's training secret, citing security concerns. No one seems to know where this protection force and its trappings come from. Instead of stun rifles, the Red Guard use force pikes, which are more likely to be lethal.

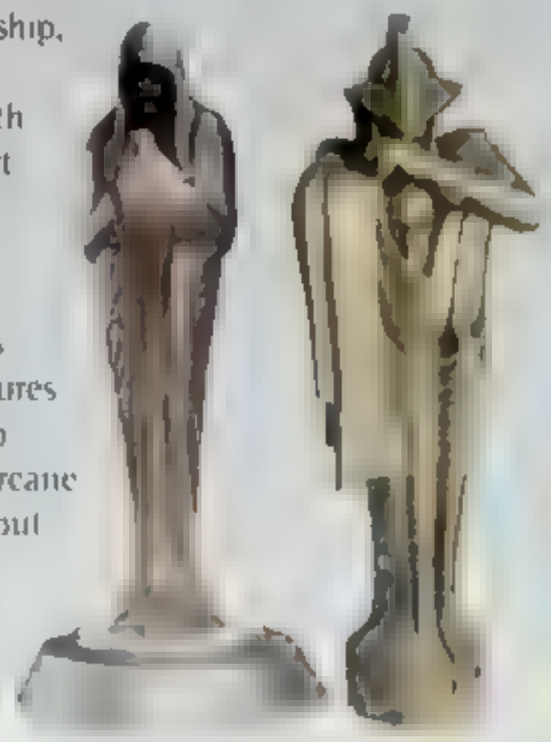
The Jedi Council often discusses political opinions with Supreme Chancellor Palpatine. The support of the great Jedi reassures many who might otherwise doubt the Chancellor's motives.

Sly Moore and Mas Amedda

Sly Moore is Palpatine's Staff Aide. She controls access to the Chancellor, which gives her tremendous power. Moore comes from the shadowy world of Umbara, deep within the dark reaches of the Ghost Nebula. Umbarans are known for their abilities to subtly influence, and even control, others.

As Speaker of the Senate, Mas Amedda is responsible for keeping order in debates. He is a stern and stoic Chagrian, who refuses to comment on the changes he has witnessed during Palpatine's tenure.

While the average citizen has grown weary of politics, momentous events are afoot. Separatists foment unrest, and rumors are rife of secret armies. In ages past, safeguards limited the power of the Supreme Chancellor—but Palpatine calls them impediments to effective leadership, and may soon overturn them, with substantial support



OFFICE IDOLS

The Senate

STAR SYSTEMS are starving under heavy taxation. Pirates plague the spacelanes, corporations consume worlds, bureaucracy stifles justice—and yet the Senate can do little. Power and wealth are corrupting this once-noble gathering until it seems that soon only money will have a voice. Honest Senators who speak out are becoming rare. Few leaders light the way in this troubled era, and even the Jedi are beginning to be unsure whom to trust.

Some Senators adopt the fashions of Coruscant, while others maintain the traditions of their homeworlds. Senators' clothing, styling, and mode of conduct can offer clues to their political sympathies.

Representative Binks

After the Battle of Naboo, Jar Jar Binks rode a wave of Naboo goodwill to become Associate Planetary Representative in the Galactic Senate. The Naboo value purity of heart over other qualifications to govern, often electing juveniles as their rulers. In the case of Jar Jar, they elevate a simple, well-meaning soul to a position that may be beyond his abilities.

Traditional banner

Few Senators can completely resist the temptation to indulge themselves. Nations, worlds, systems, and staggering wealth can be had in illicit exchange for votes or strategic abstentions on critical legislation.

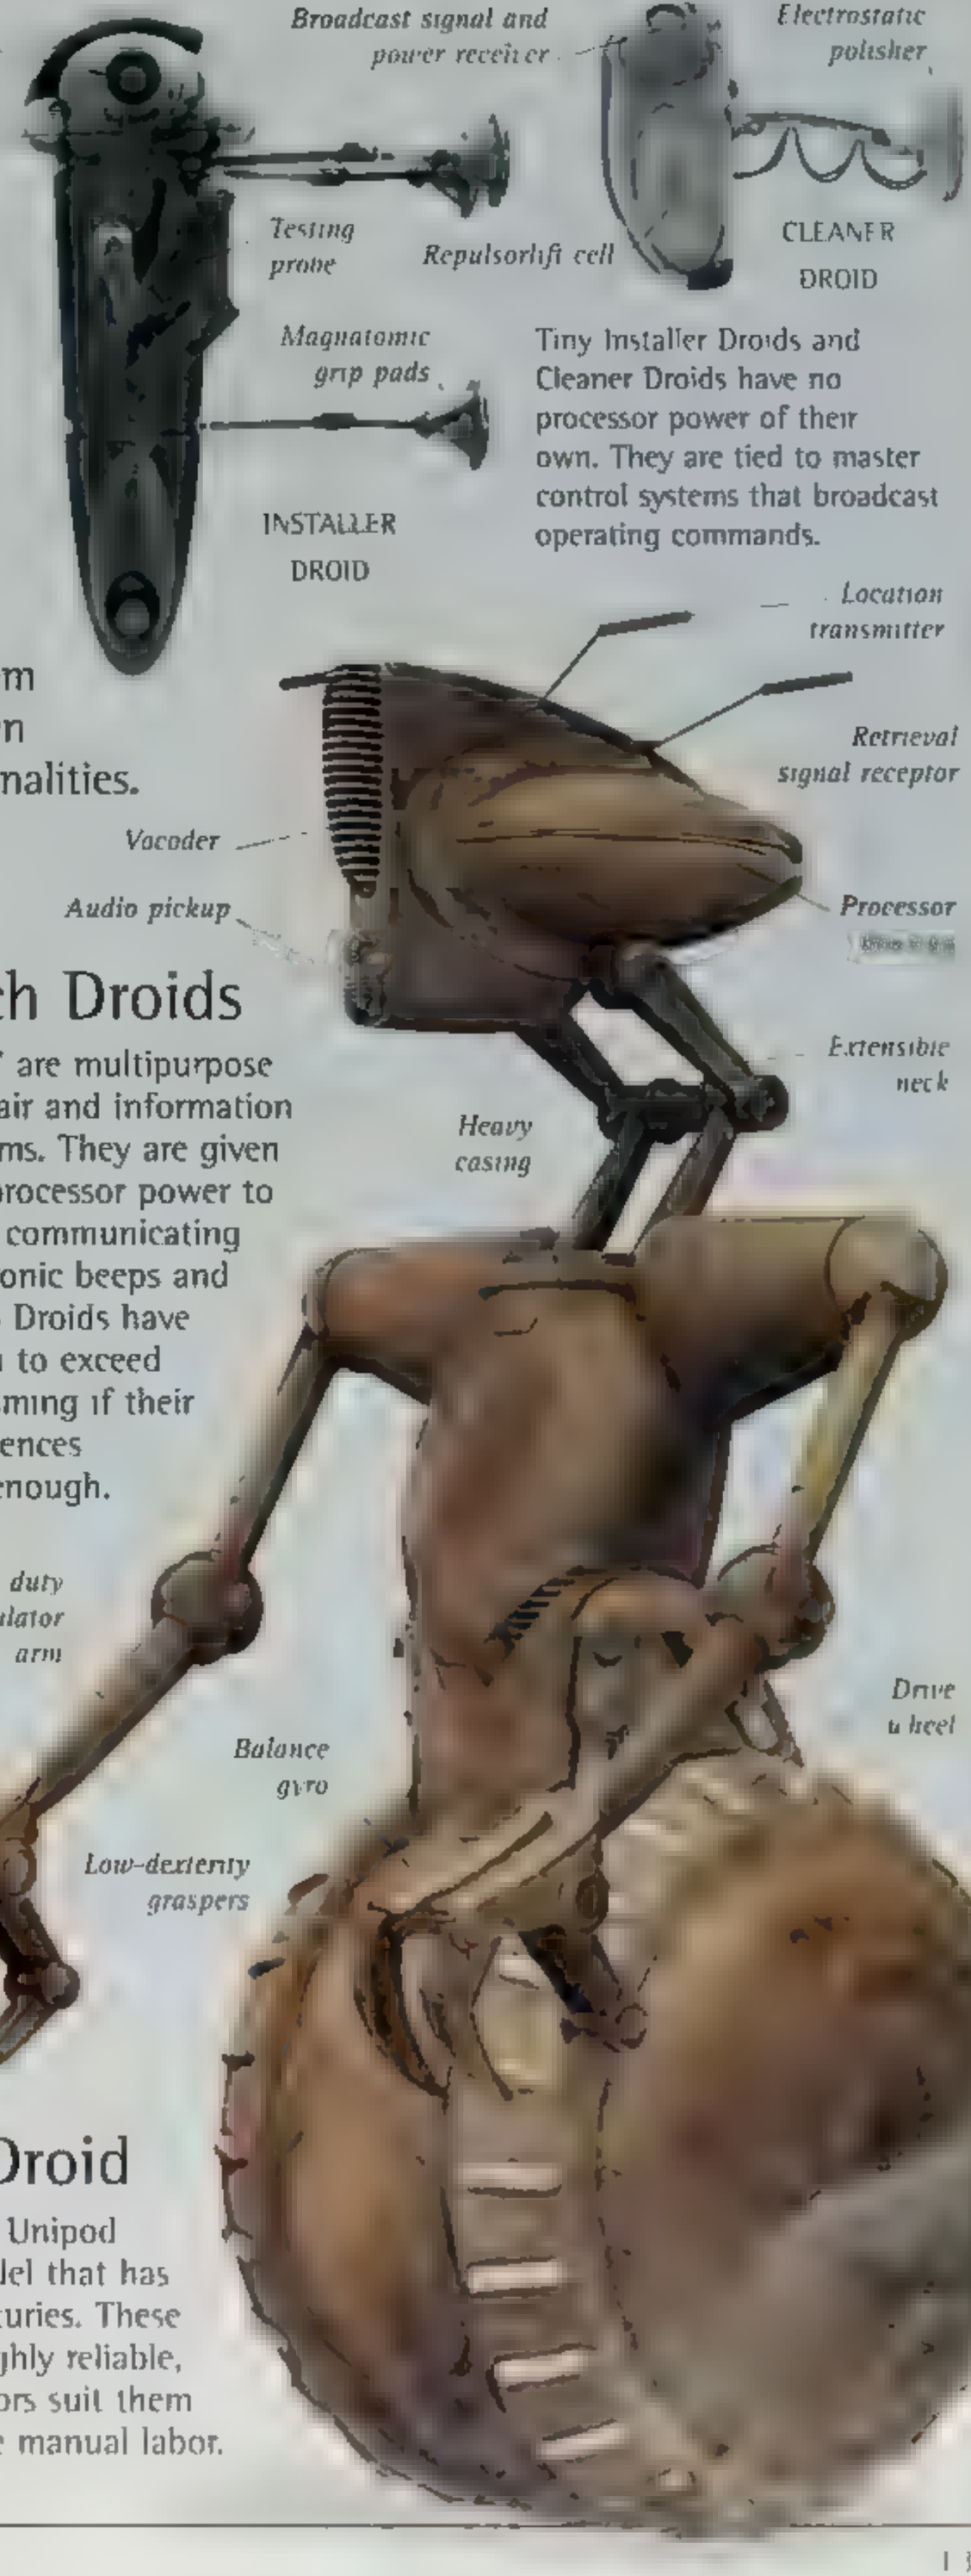
Bail Organa

Bail Organa of Alderaan is a noble Senator in an ignoble time. In ages past, he would have been revered as a great leader. Amid the current moral decay, Bail's colleagues demean him as simplistic for his eloquent and impassioned support of the value of civic virtue.

Droids

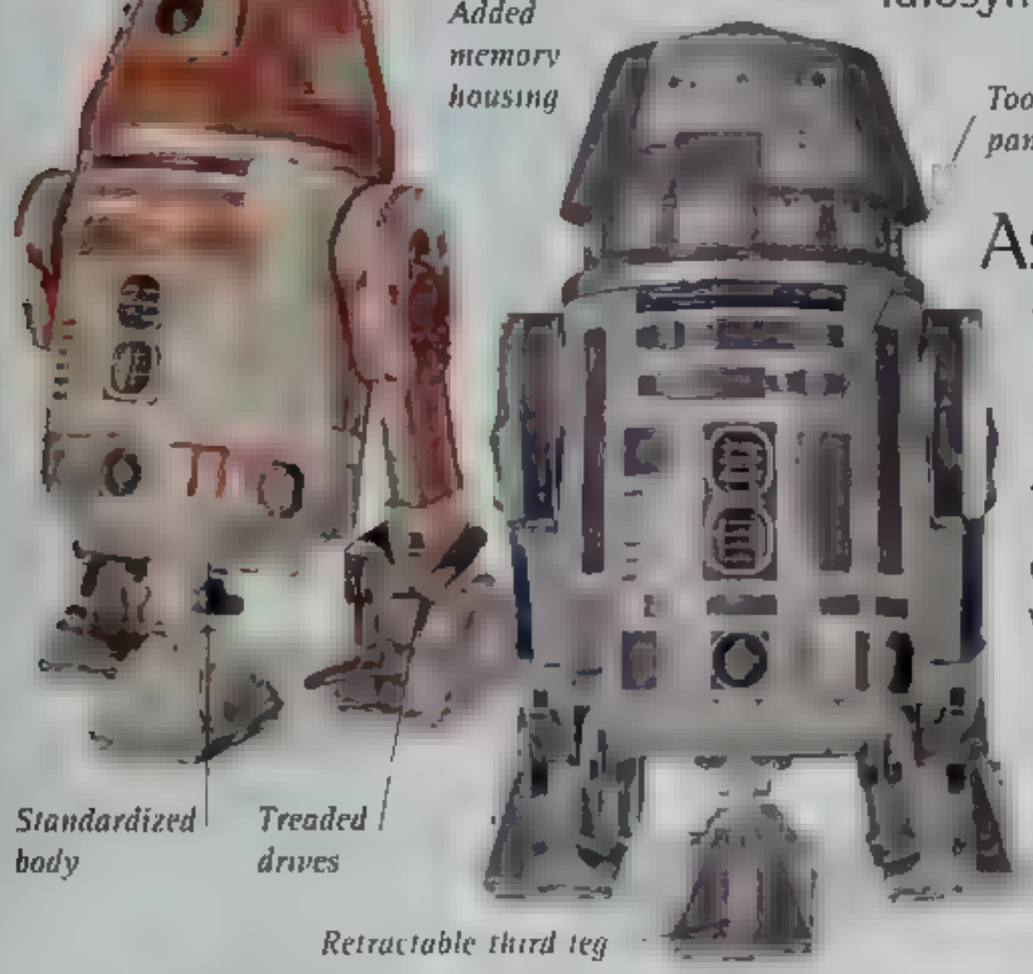
DROIDS RANGE FROM simple machines to complex, sentient artificial beings. They are generally treated as mere utility devices regardless of their level of intelligence, and most citizens hardly notice them. Memory wipes, which are customarily performed when a droid acquires a new owner, can delete filed information or completely erase a droid's stored experiences. When "zeroed" this way, even sophisticated droids may be rendered barely self-aware. If allowed to build experience between memory wipes, some droids seem to develop individual identities and even idiosyncratic personalities.



Tiny Installer Droids and Cleaner Droids have no processor power of their own. They are tied to master control systems that broadcast operating commands.

Astromech Droids

"Astro Droids" are multipurpose computer repair and information retrieval systems. They are given just enough processor power to do their jobs, communicating only via electronic beeps and whistles. Astro Droids have an inclination to exceed their programming if their stored experiences develop far enough.



DATA FILE

- Droids are frequently misused because galactic law treats them as machinery regardless of their self-awareness.
- Droids are banned on some worlds where their ultrasonic frequencies irritate sensitive species.

On Tatooine, Unipod Droids pull rickshaws that float on unlicensed broadcast-power repulsors.

Unipod Droid

Compact, semi-humanoid Unipod Droids are an ancient model that has seen little change for centuries. These stoutly built droids are highly reliable, but their minimal processors suit them for little more than simple manual labor.

Obi-Wan Kenobi

HYPERDRIVE RING

A DEDICATED JEDI KNIGHT facing a time of great crisis, Obi-Wan Kenobi finds himself at the heart of galactic turmoil as the Republic begins to unravel. Kenobi has witnessed the death of his Master, Qui-Gon Jinn, and knows the challenges the Jedi face in the defense of justice. He is cautious where his apprentice, Anakin Skywalker, is impulsive. Kenobi strives to train his young Padawan in the discipline that will make him a pillar of strength against the dark side of the Force. As dangers unfold around him, Kenobi's abilities and judgment form one of the last bulwarks against the collapse of the Republic.

Obi-Wan's Jedi apprentice is Anakin Skywalker, the boy suspected of being the prophesied individual who can "bring balance to the Force." Anakin's independence, born of his late induction into the Order, has brought Kenobi reprimands from Jedi elders Yoda and Mace Windu.

Trailing a would-be assassin into a nightclub on Coruscant, Kenobi steps casually to the bar "to have a drink." As planned, his apparent relaxation draws out his quarry, who finds that the Jedi's extraordinary powers give him a lightning edge—it [illegible]

Field Agent

Accomplished in a wide variety of skills ranging from diplomacy and psychology to military strategy and hand-to-hand combat, Obi-Wan has to be ready for anything on his field assignments. On Kamino, his investigation bursts into explosive conflict when bounty hunter Jango Fett resists arrest. Covered in armor and weaponry, Fett is a professional at the top of his field, but he cannot overcome Obi-Wan. The best Fett can manage is escape—with a powerful tracer beacon attached to his ship.

Anakin Skywalker

TWENTY-YEAR-OLD Jedi Padawan Anakin Skywalker is gifted with extraordinary Force skills and piloting abilities. His talents make him impatient with Jedi traditions that seem to hold him back and he often disagrees with his more cautious Jedi Master, Obi-Wan Kenobi. Skywalker was accepted into the Order at the age of ten, far later in life than its rules allow, and his emotional bond with his mother was already strong. Unlike other Jedi, Anakin struggles with the pain of this separation. Jedi Council members suspect Anakin of being the prophesied One who can bring balance to the Force. But in an increasingly unbalanced world, Anakin must face ever steeper challenges to master the dangerous force that is himself.

Anakin is capable but not yet professional, criticizing his Master Kenobi in front of their charge, Senator Amidala. Anakin prefers to exceed his and Obi-Wan's mandate to only protect Padmé by trying to discover who is after her.

UTILITY BELT

LIGHTSABER

Most Jedi Padawans build their lightsabers to resemble those of their Masters as a gesture of respect. Anakin constructed his own lightsaber while in a trance-like state, resulting in a design that favors maximum strength.

Blue lightsaber blade generated via traditional Jedi crystals is more maneuverable but slightly less powerful than blade using synthetic Sith crystals

Dark Knight

The tunics, robes, and cloaks worn by Jedi are honored traditions, but not uniforms. From the time they become Padawans, Jedi are free to dress as they choose. Anakin Skywalker breaks with tradition in his garments, both in their color and material. His distinctive dark clothing makes him stand out at the Jedi Temple and draws concern from Jedi elders.

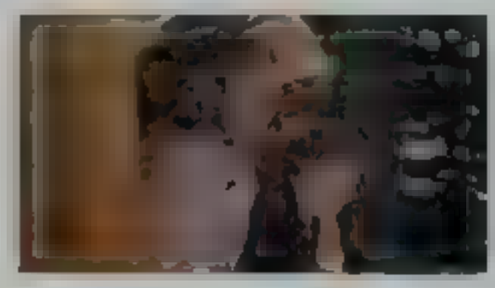
Airspeeder



Anakin is possibly the best pilot ever to train within the Jedi Temple. When he commandeers an airspeeder in pursuit of an assassin on Coruscant, his abilities are phenomenal. Anakin violates Jedi policies on vehicular speed and risk–guidelines intended to safeguard other craft, but not designed with so gifted a pilot in mind. Anakin's antics prompt the remark from Obi Wan, "Why do I get the feeling you're going to be the death of me?"

On Coruscant, Anakin suspects that Padmé has feelings for him. On Naboo, where Anakin's charm is in full force, Padme's feelings become transparent—but the inherent danger of their passions frightens both Senator and Jedi.

Forbidden Feelings

Only 20 Jedi have ever left the Order, but Anakin is coming perilously close. When he is assigned to protect the woman he has loved since childhood, he is torn between love and duty. The Jedi discipline does not seem to help him as it does the others, so his loyalties are put to the test: Will he insist on being an exception to the rules of the Jedi Order?

Zam Wesell

ASN-121
ASSASSIN DROID

AS A CLAWDITE SHAPE-SHIFTER, Zam Wesell can change her appearance to mimic a range of humanoid forms, giving her a special edge as a hired assassin. Zam learned her trade on Denon, the globe-girdling metropolis second only to Coruscant as a center of galactic business. In the high-risk world of industrial espionage, Zam rose from corporate security sergeant to executive bodyguard before seeking higher fees for contract execution and bounty hunting.

For some years Zam has worked on and off with renowned bounty hunter Jango Fett. Her latest job with Fett takes her to Coruscant, where Jango entrusts her with the assignment of killing a prominent Senator. Wesell knows that this opportunity will enhance her reputation and allow her to return to Denon as a master in her field

Bounty Hunter

A loner with few close associates, Zam Wesell is typical of bounty hunters. She inhabits a gray zone that extends to both sides of the law. Arrogant, highly skilled, and feeling unchallenged by legal bodyguard and security work, Wesell regards bounty hunting as a more suitable channel for her superior talent.

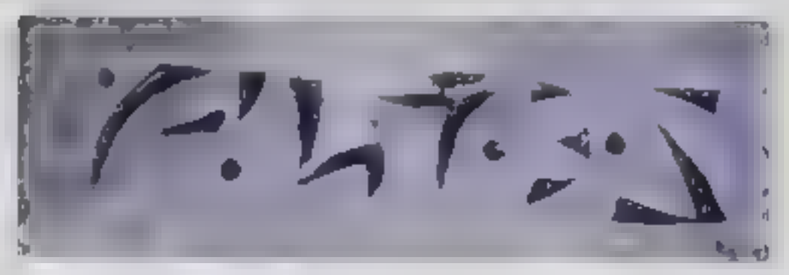
KOUHUNS

Zam uses two deadly kouhuns for her Senatorial assassination job. Small, silent arthropods like the kouhuns of Indoumodo can evade even tight security. Unlike projectiles or energy weapons, they are virtually impossible to trace back to their users. Kouhuns are starved in advance, so they head straight for warm-blooded life forms when released, and use a fast-acting nerve toxin to kill their prey.

CAPE SEAL



Zam's discipline derives from the teachings of the Mabari, an ancient order of warrior-knights on her homeworld. She wears Mabari inscriptions and stylized emblems, including a cape seal that is an ancient Mabari artifact

Zam favors her KYD-21 blaster pistol for both attack and defense, though Jango has begun teaching her that projectile weapons can be useful when working invisibly in the dark.

KYD-21 Blaster

Though she carries a projectile rifle at Jango's insistence, Zam's primary weapon is a compact, precise KYD-21 pistol. She finds she can hide a pistol more easily when she needs to disguise herself as a non-threatening presence in order to close in on her mark.

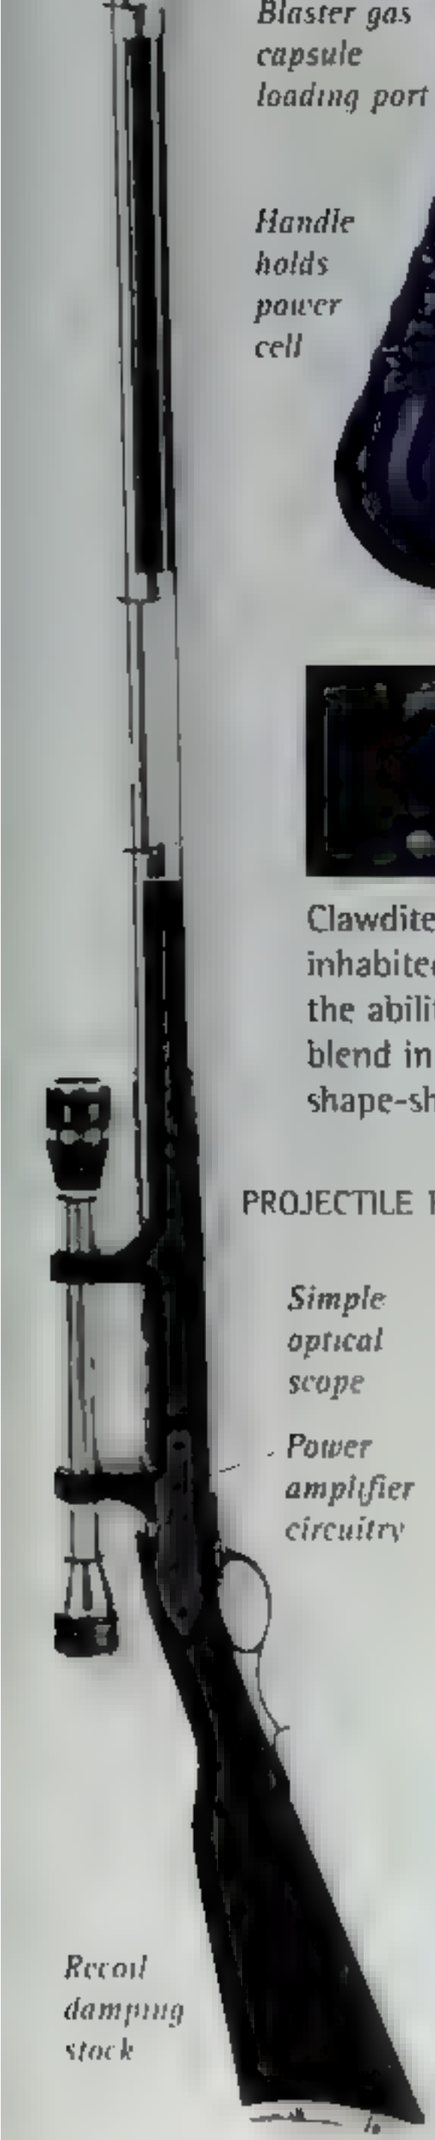
Clawdite shape-shifters, or "changelings," evolved on a world inhabited by warring humanoid subspecies. Shape-shifters developed the ability to mimic the appearance of other species in order to blend in without being killed. As a changeling dies, its ability to shape-shift fades and it returns to a neutral Clawdite configuration.

SABERDART

Preferring to leave no trace, Zam dislikes projectile weapons. A saberdart such as Jango might use may be silent and highly lethal, but has the potential to lead pursuers back to its source.

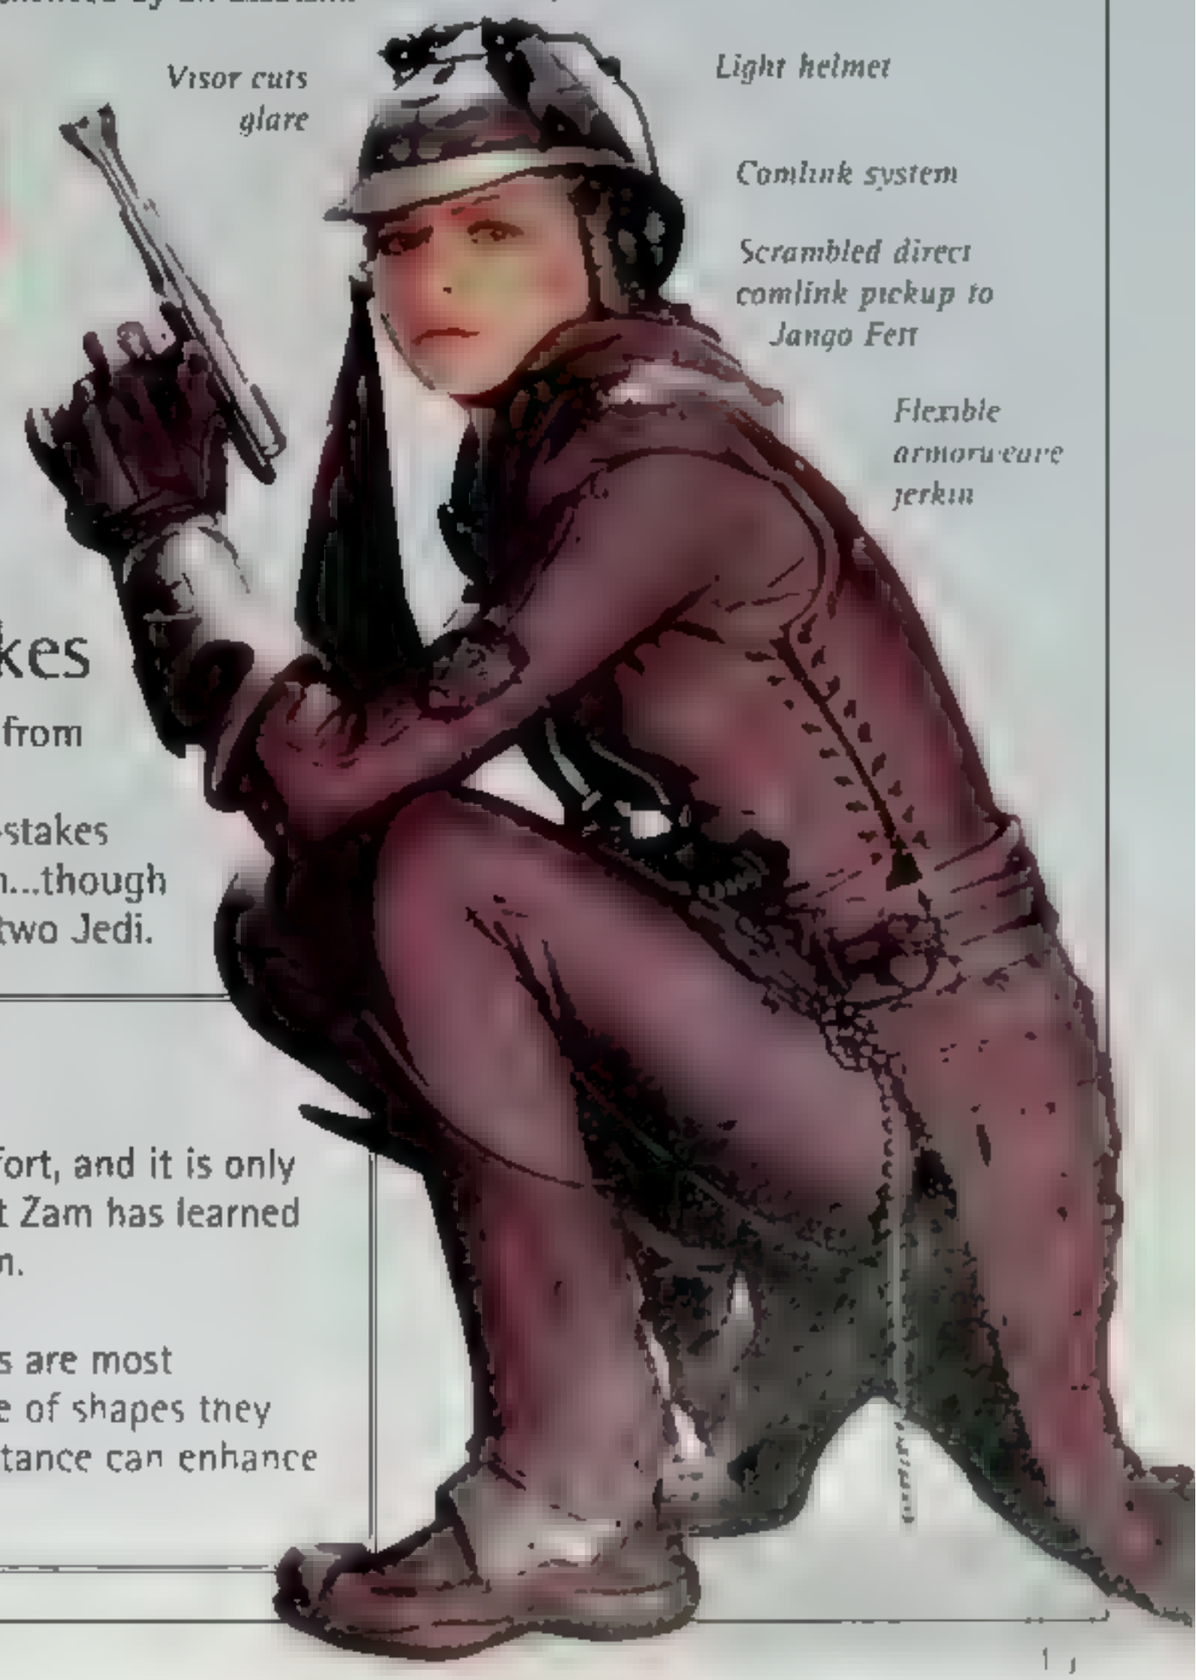
Under intense Jedi mind-pressure, Zam begins to reveal her employer, until she is silenced by an assassin.

PROJECTILE RIFLE

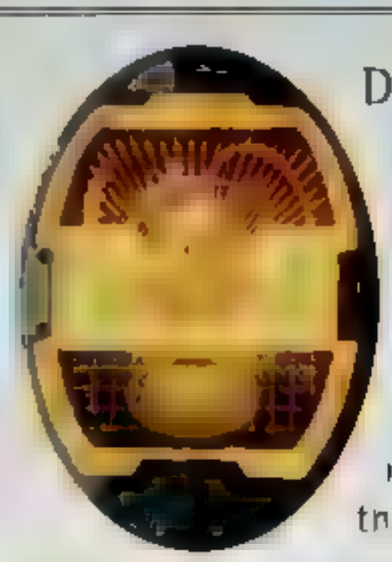


High Stakes

Zam knows that in accepting a risky assignment from Jango Fett, she is in danger of being used as an expendable pawn. Such are the risks of the high-stakes trade in death, and Zam is prepared to take them...though she will find that she is not equipped to outrun two Jedi.



DATA FILE



- Shape-shifting takes effort, and it is only through long practice that Zam has learned to rest in a mimicked form.
- Although shape-shifters are most effective at a limited range of shapes they imitate often, medical assistance can enhance their abilities much further

A realm of artificial illumination, the lower levels of the galaxy's largest city are the only affordable areas for many of the planet's citizens. Rumbling with machines that serve the elite above, its streets haunted by exploiters and thugs, and its walls riddled with weird vermin, Coruscant's underworld toughens the strong and consumes the weak.

Coruscant's underlevels harbor a larger population than do many entire star sectors, leaving millions beyond the effective protection of Coruscant's security force. Local neighborhoods may fall to the mercy of hired thugs and extortionists. But the toughest faces sometimes belong to vigilantes, who choose to defend the people on their own turf from criminals who would abuse them.

Underlevel Coruscanti hail from all parts of the galaxy. Many immigrants arrive with only a small case of belongings from their homeworlds, little prepared for the challenges they find.

Stone Mite

Stone mites are a scourge of cities and starships alike, picking into raw metal plating with their wire-cutting jaws and acid saliva. Complex electrolytic reactions fuel their metabolism and harden their exoskeletons. Suspected of being the products of military genetic engineering, three stone mite individuals link to form symbiotic trionts, excreting a common globular shell.

Duracrete Slug

Vermin from every corner of the galaxy infest the underworld. Duracrete slugs are inadvertently brought in freighters and in offworld cargo to the world-city, where they live off the artificial stone in building foundations, burrowing deeply and weakening structures. Normally reaching three to five meters in length, they have been reported at colossal sizes of over ten meters in Coruscant's underlevels.

Conduit Worm

Conduit worms infest millions of miles of electrical wiring channels on Coruscant. These life-forms live off the faint electrical fields surrounding powered wires. Without a head, tail, or body core, they spread throughout a power system, growing body components when needed. Underworld Coruscanti fear power blackouts, since conduit worms are known to creep from outlets in search of electrical activity, which they sense in humanoid brains. Being awakened by a conduit worm's feeler threads trickling into one's ear is enough to make almost anyone wish to move off-world.

AGAINST THE SPECTACULAR BACKDROP of the largest city in the galaxy, the Outlander provides a setting for a wide variety of purposes. While some patrons pass through its doors just to have a good time, most are in search of something else: a companion, a sale, or someone to con. Weaving among the would-be glitterati are low-lifes and criminals searching for gullible victims to exploit. For all of them, the gambling club is a place that makes the rest of the world fade away. To an assassin on the run, the Outlander is a potential haven—if Zam can somehow lose the pursuing Jedi among the crowd.

Obi Wan and Anakin exercise subtle teamwork when they trail Zam to the Outlander. Anakin enters the crowd to flush out the target while Obi-Wan bides his time, waiting for Wesell to make her move.

Dexter's Diner

AFTER BOUNTY HUNTER Zam Wesell is killed by a mysterious toxic saberdart, Obi-Wan Kenobi heads for the haunt of a four-armed Besalisk named Dexter Jettster. Dexter's unassuming diner serves more than hearty food—favored diners can also obtain nuggets of precious information. The brusque but good-hearted Jettster has a chequered past with expeditionary oil-harvesting crews across the galaxy. He spent many years manning rigs, tending bar, cooking chow, brawling, dealing in contraband, and running weapons on the side to disaffected locals. On Coruscant, Dexter has made a fresh start with his diner and enjoys his stable and straightforward new employment.

Within the endless metropolis of Coruscant, the "world of worlds," one can find nearly anything if one knows where to look. Well off the fashionable dining routes, in a business and manufacturing district, lies the small installation known as Dexter's Diner.

Dexter's cooking provides an alternative to Coruscant's often bizarre menus. It was the unidentifiable "vercupti of sgazza boleruueé" on the Jedi Temple Main House menu one day that drove Obi-Wan to try the diner, and rekindle his friendship with Dexter Jettster.

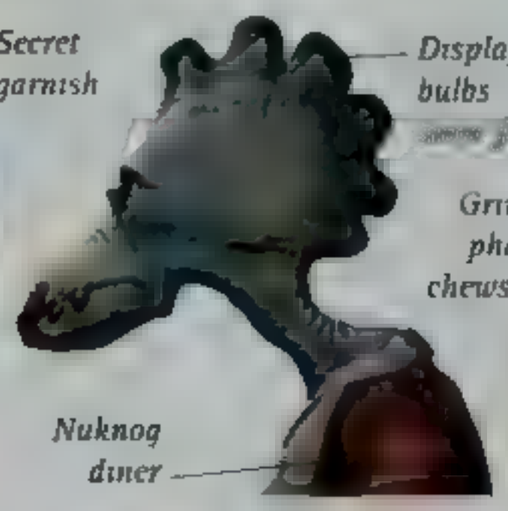
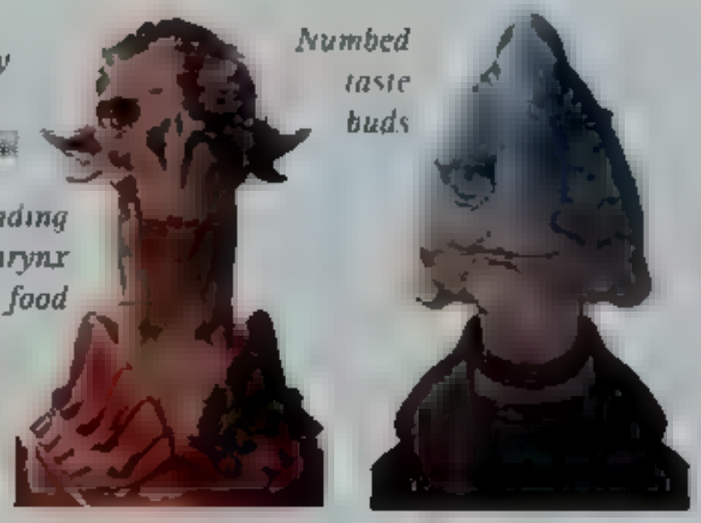
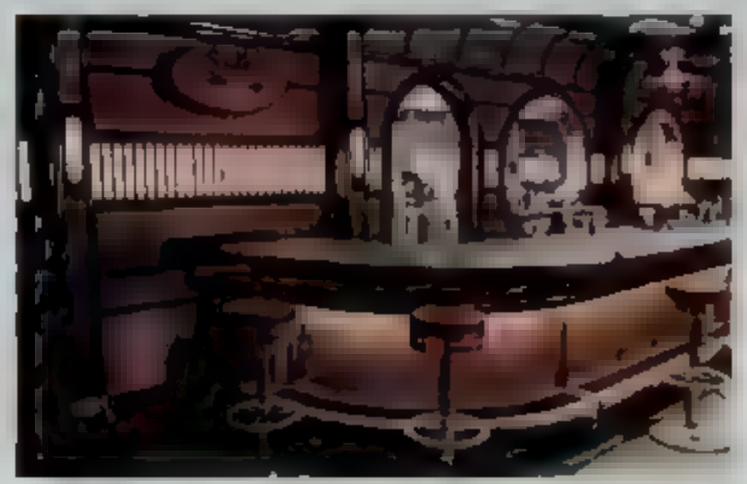
Dexter's "sliders" make the most of trans-shipped, medium-density food-board. Rejecting elaborate preparations, Dexter merely grids the food board, perforates it with five holes, and serves it as a sandwich with his special garnish.





Slider Fans

Regulars at the diner travel light-years out of their way just to satisfy cravings for Dexter's small, square sliders—often furtively downing a mild, pink antidote first, to avoid gastrointestinal distress. Occasional visitors have accused Dexter of adding small quantities of addictive drugs to the slider garnish... but this is, of course, mere slander.



Amid Coruscant's millions of identical food stations, Dexter's Diner offers an appealing and comfortable setting that recalls the traditional appearance of diners from the golden days of the Galactic Republic

Sharp-eyed Chef

Trusted by his shady old associates as well as his new crowd of regulars, Dexter is a friend to beings from all walks of life. This chief cook and bottle washer is an individual of broad experience and diverse connections. Hidden within his sloppy exterior, Dexter has a keen sense of observation and a retentive memory that can serve up vital information even to the likes of a Jedi Knight.

A wise field-agent maintains contacts on the fringe of the underworld. Dexter Jettster is glad to help Obi-Wan, knowing he is not a judgmental and pompous creep like so many other elite or high-station Coruscanti.

Jedi Temple

The Jedi Temple on Coruscant occupies hallowed ground sanctified by the noble efforts of Jedi dating back many thousands of years into remote antiquity.

FOR MILLENNIA the Jedi Temple on Coruscant has served as the training ground and home base of the Jedi Knights, peacekeeping defenders of justice throughout the galaxy. At the Temple, Jedi initiates learn the ways of the Force, a mystical energy field created by all living things. Hundreds of other individuals who are not Jedi Knights provide vital support in everything from operations management to technical analysis. The galaxy is so large that complete law enforcement is impossible; so most Jedi rove through assigned regions on "journey missions," empowered to support justice as they see fit. Jedi based at the Temple travel on special assignments.

Active Jedi

Jedi begin their lifelong training when they are recognized as gifted children. They accept a life of total dedication and self-sacrifice to become diplomat-warriors. As initiates, they train together until they are accepted as Padawans, or apprentice learners. They must then face the Trials to become Jedi Knights, who are allowed in turn to take on an apprentice and earn the title of Master.

Jedi come from every corner of the galaxy. Jedi Master Shaak Ti is a Togruta, a species which lives in dense tribes on the planet Shili, where the disruptive coloration of their long lekku (head-tails) serves to confuse predators. Unlike most of her kind, Shaak Ti is a highly independent spirit.

Yoda

THE WISE YODA is the sole member of the Jedi Council to recognize the present danger of Jedi complacency. Yoda sees that, in these troubled times, the greatest challenge may come from within the system itself. Even at his advanced age and with his formidable reputation and responsibilities, Yoda still trains young initiates. His students are taught to take nothing for granted and to keep their minds open to every possibility, avoiding the pitfalls of overconfidence.

Obi-Wan Kenobi has grown close to Yoda since the death of Kenobi's Jedi Master, Qui-Gon Jinn. Facing a difficulty in his current assignment, Obi-Wan does not hesitate to consult with his wise friend and colleague, who in turn uses the opportunity as an exercise for his young Jedi initiates.

Hidden Strengths

Yoda's capabilities with the Force give him amazing strength and speed, as well as the ability to levitate. These special powers, combined with his knowledge of fighting tactics, allow him to overcome virtually any opponent, though times are few indeed that Yoda has actually used his lightsaber in combat.

Jedi Archives

EVER SINCE the ancient origins of the Jedi Order, knowledge and its mastery have been vital to the Jedi mission of supporting peace and justice throughout the Republic. The great Archives Library in the Jedi Temple safeguards the accumulated knowledge gathered by millions of individuals over hundreds of generations. It is a repository of seemingly infinite information on every part of the known galaxy and on billions upon billions of its inhabitants. The Archives is the greatest library in the Republic, and an incomparable asset to the Jedi, whether they are acting as diplomats, counselors, or fighters.

The Main Hall of the Jedi Archives holds most of its information in holobooks to prevent electronic access by overly curious outsiders. Some of the holobooks date back many thousands of years to the earliest days of the Galactic Republic.

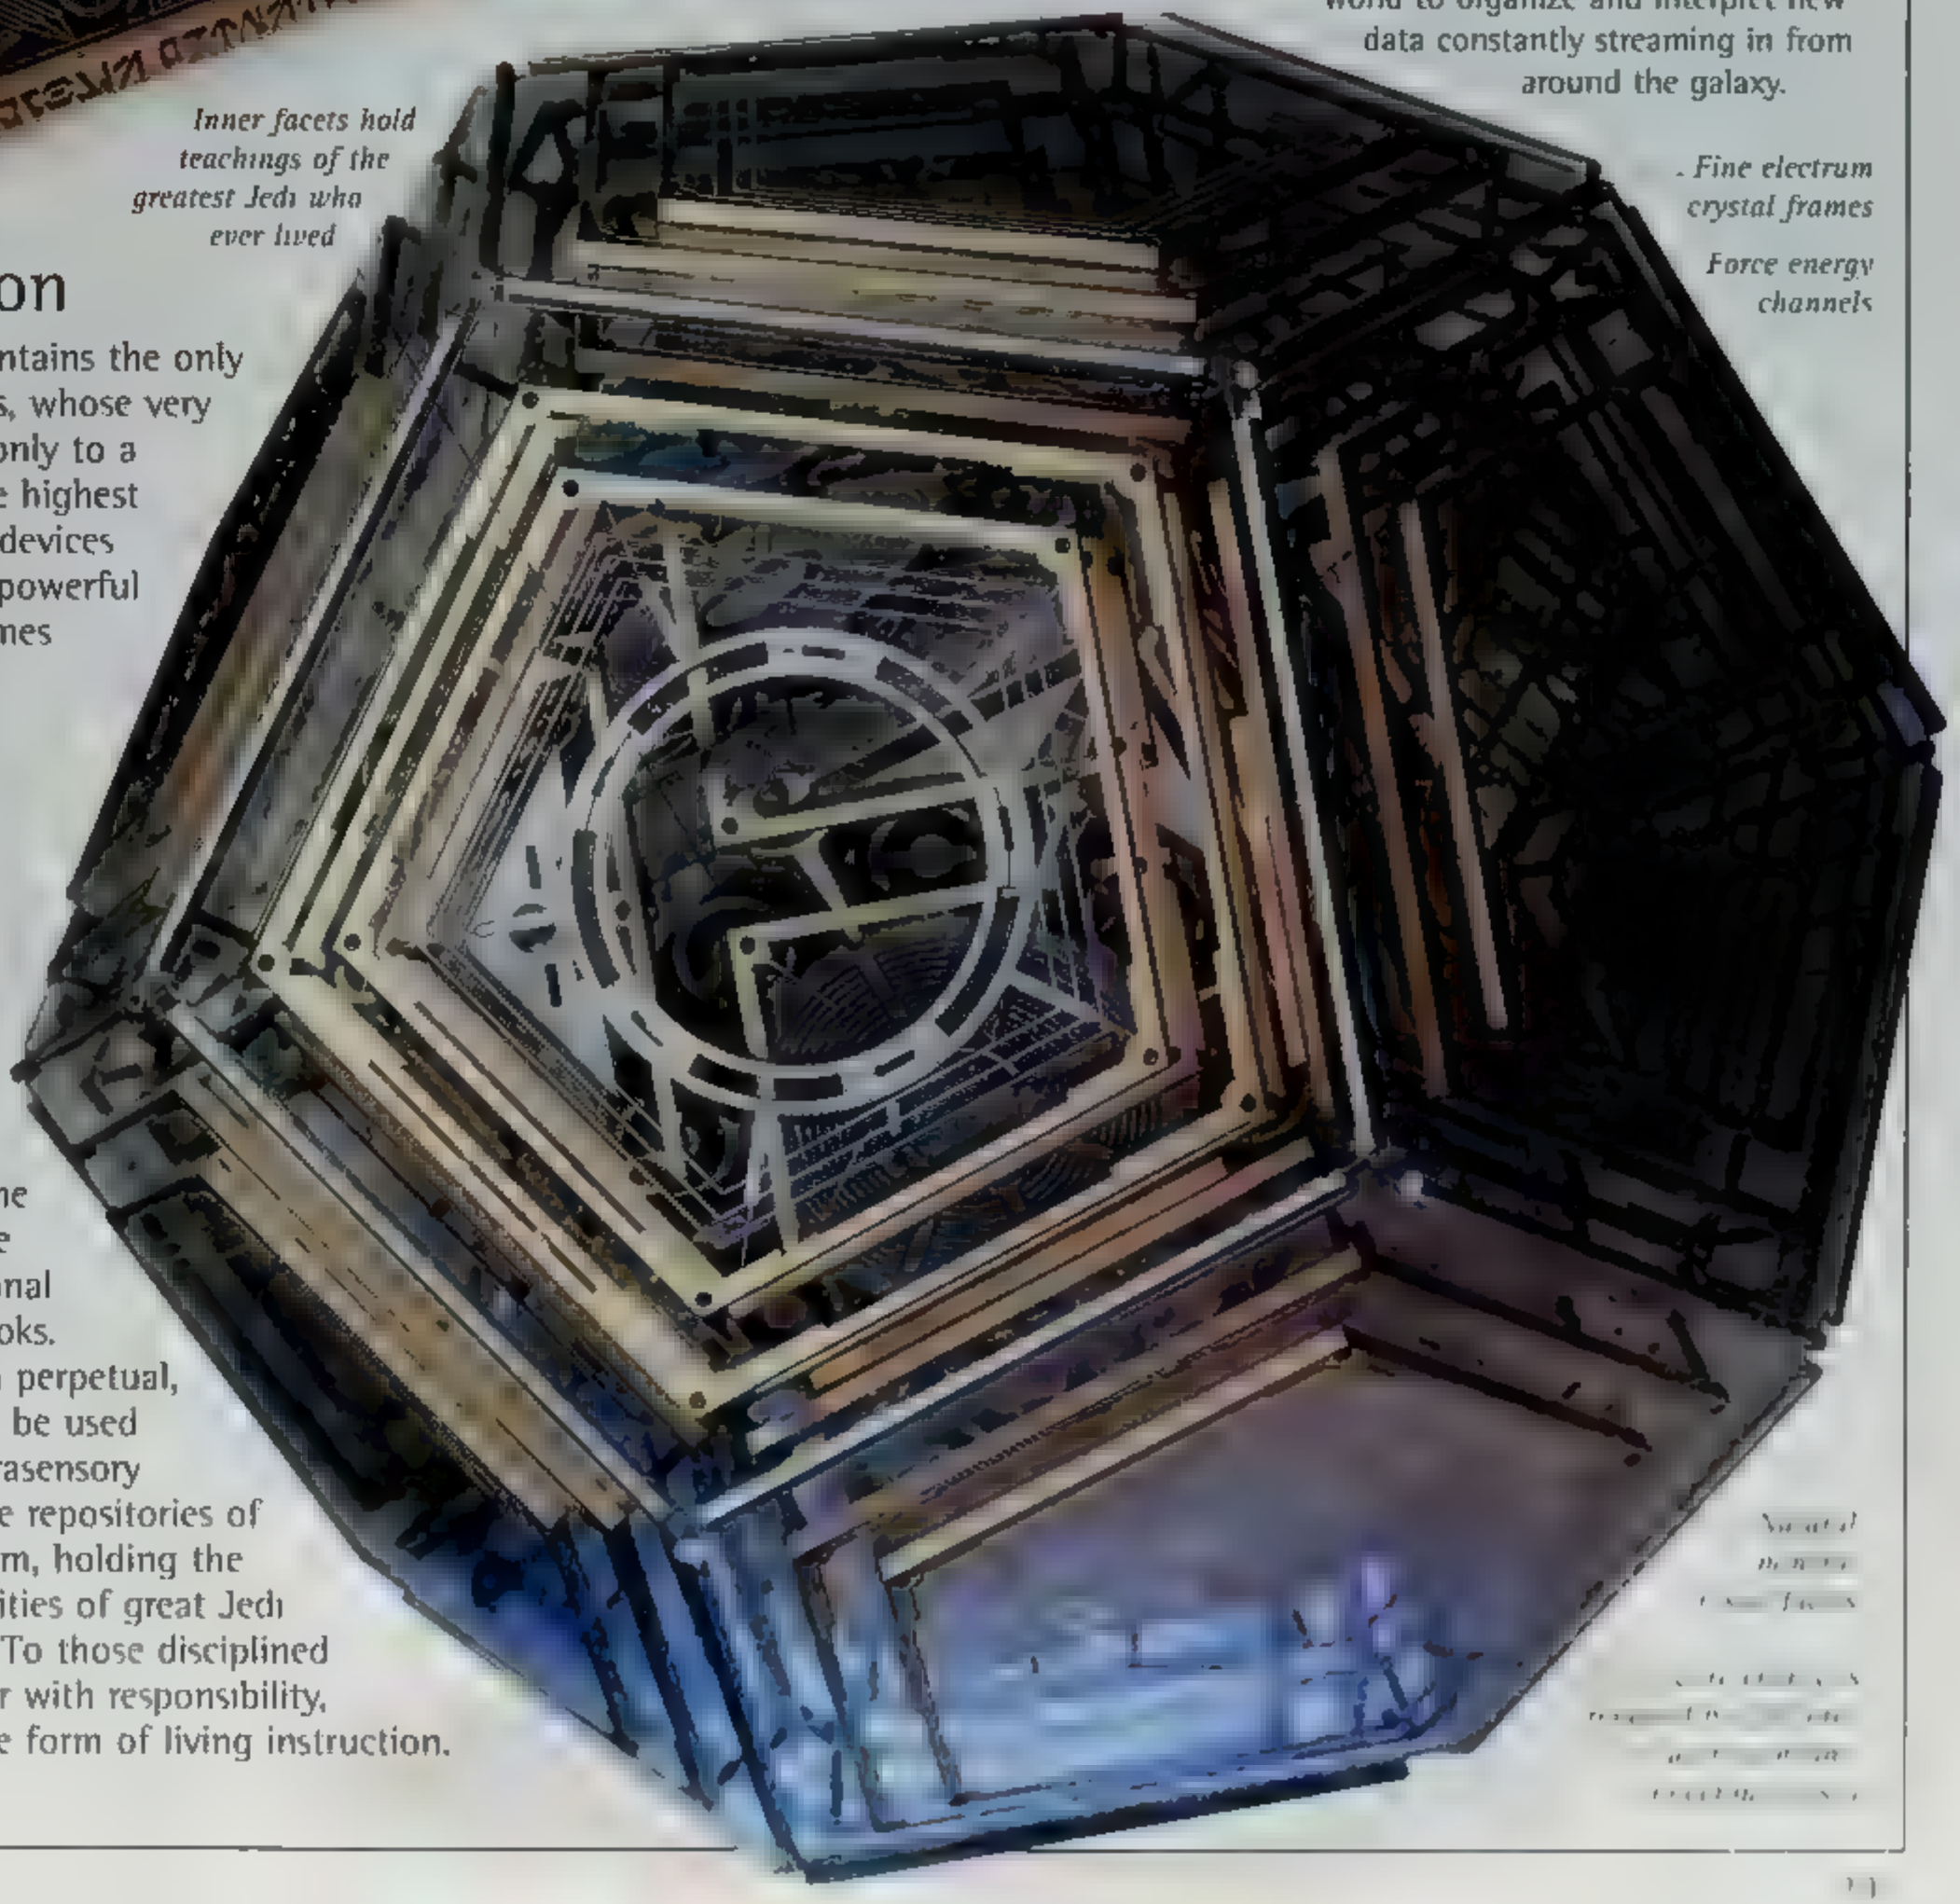
Holocrons

The ancient Jedi Holocrons stored in the Archives transcend the capabilities of traditional data files and holobooks. They are imbued with perpetual, subtle power and can be used only by Jedi with extrasensory abilities. Holocrons are repositories of knowledge and wisdom, holding the teachings and mentalities of great Jedi Knights and Masters. To those disciplined enough to bear power with responsibility, they serve as a unique form of living instruction.

Secret Repositories

The greatest Jedi secrets are safely encapsulated deep within the Holocrons, away from those who might misuse them. As Jedi advance in their ability to use the Force, they find increasingly powerful insights and teachings ever deeper in the Holocrons.

Holobooks are used with informatic stations connected to the outside world to organize and interpret new data constantly streaming in from around the galaxy.



Freighter Trampers

FOR CENTURIES, Coruscant has attracted immigrants in search of seemingly infinite opportunities. As the present turmoil leaves individuals uncertain of their future, many are now heading back to their homeworlds or further out into the galaxy in search of new employment. Among these migrants are the freighter trampers, so-called because they commute from job to job on the freighter lanes. The trampers form a community of their own, and such a diverse mix forms an ideal environment in which Anakin and Padmé may travel unnoticed.

Cramped quarters

On the freighter, Padmé travels with a minimum of belongings, as she is no longer required to wear the formal attire of political office.

Freighter food is the epitome of utility nourishment. Cookdroids are programmed to use the most basic and inexpensive recipes, which ensures that a wide variety of humanoids and aliens will find the food edible.

Economic Refugees

Many freighter trampers indenture themselves to corporations in order to earn the cost of their passage to new worlds in search of work. However, many find that when they arrive, the long-hoped-for employment has disappeared. They then have to indenture themselves for a second passage to another world, starting a cycle in which millions live in a form of bondage little different from slavery.

Padmé Naberrie

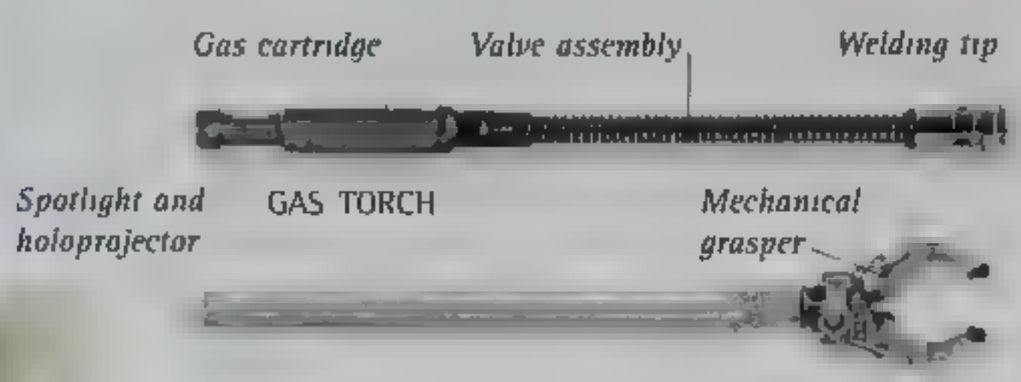
WHEN PADMÉ NABERRIE last saw Anakin Skywalker, he was just a boy, though she sensed something special about him even then. Now that Anakin has re-entered her life, Padmé is amazed at the effect the young Jedi has on her. She senses a connection that overcomes all her efforts to deny it, a feeling in conflict with her dedication and determination to serve her people. Her increasingly dangerous life and her exposure to the death of loved ones force Padmé to realise how precious every minute is. At the crucial moment, she becomes determined to live as fully as possible no matter what the consequences—and if she is to be destroyed, she will go down fighting.

After her years in political service, the planetary government complex on Naboo serves as a familiar walking place for Padmé.

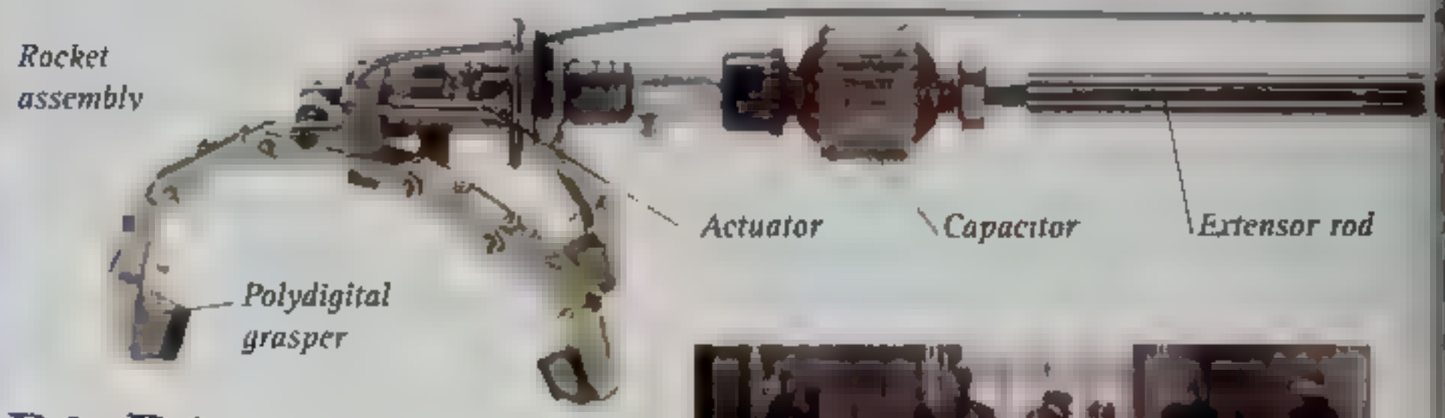
Padmé's family home in the Lake Country is called Varykino. It is here that she feels safest and can most be herself.

Symbol

All high offices on Naboo are elective, yet they carry with them the complex dress codes associated with hereditary nobility. Padmé accepts the symbolic value of such trappings but would prefer to wear clothes that express her own identity.



Astromech Droids are built for versatility and are easily fitted, and re-fitted, with a range of standardized parts and equipment.



R2-D2

Padmé is faithfully attended by R2-D2, an Astromech Droid that regularly exceed its programming in loyal service. While droids are disregarded through most of the galaxy, on open-hearted Naboo, Padmé is not unusual in feeling an affection for a mechanical servant who seems so spirited.

When Padmé returns from Coruscant, she consults with Queen Jamillia in Theed's Royal Palace. There, her old colleagues and political advisors struggle with small Naboo's surprisingly important role in the wider world of galactic politics.

At Varykino, Padmé talks with Anakin about the difficult situation they face: Their demanding careers do not allow either of them to fall in love.

The Jedi and the Senator share their views on how galactic politics ought to run. Both are in positions to affect such matters.

Kaminoans

WHEN A GLOBAL CLIMATE SHIFT flooded their planet, the Kaminoans were forced to adapt. They developed cloning technology and practised selective breeding to keep their race alive. As a result of the hardships endured during the Great Flood, the Kaminoans have an austere, non-materialist outlook. They are outwardly polite, yet behind this lurks an extreme intolerance of physical imperfection. The Kaminoans are reliant on certain outworld technologies and raw materials to maintain their advanced society, so they use their cloning abilities to produce goods for export. When a Jedi named Sifo-Dyas placed an order for a massive clone army a decade ago, the Kaminoans embarked upon the largest human cloning project ever undertaken.

The planet Kamino once had extensive land areas, but the melting of inland continental glaciers sank all and beneath the waves. Today, only the Kaminoan stilt cities project above the water, forming colonies of varying sizes around the planet.

Kaminoans use domesticated aiwhas for sport and transportation between close-sited colonies. These animals can fly and swim with equal ease, controlling their density using a water-vascular system. This system allows the aiwhas to fill their spongy tissues with seawater when they want to swim underwater, and to wring the water out and shed it to lighten themselves for flight.

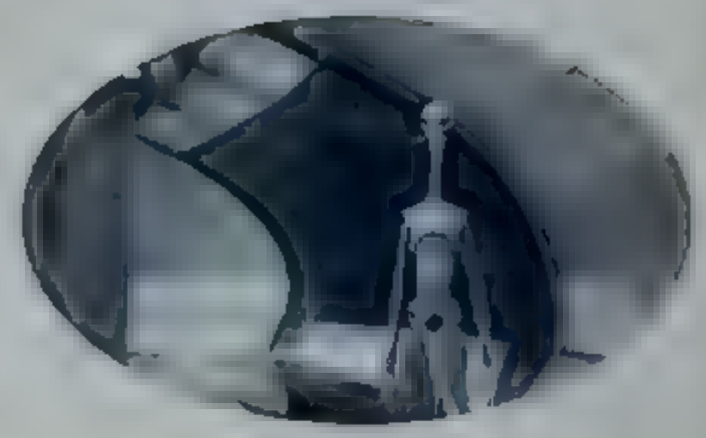
CLONE ARMY PROJECT EMBLEM

Clone Trooper Growth

THE MYSTERIOUS Jedi Sifo-Dyas ordered from the Kaminoan cloners a secret army created from a single individual. An agent named Tyranus selected the clone-source: Jango Fett, a man whose natural combat ability and high endurance level would produce the ideal soldier. Under Kaminoan Chief Scientist Ko Sai, the clones' genetic code was altered to accelerate their growth to twice the normal human rate, and their mental structure was subtly reconfigured to make them obedient to authority. Comprehensive training shapes the identity and abilities of the clones throughout their development. The result of this colossal project is an army of identical soldiers produced in a world of clinical efficiency.

The clones begin life as artificially created embryos that are mass-produced in the Egg Lab.



Most Kaminoans regard the clones as laboratory specimens but Taun We feels some affection for the young cadets.

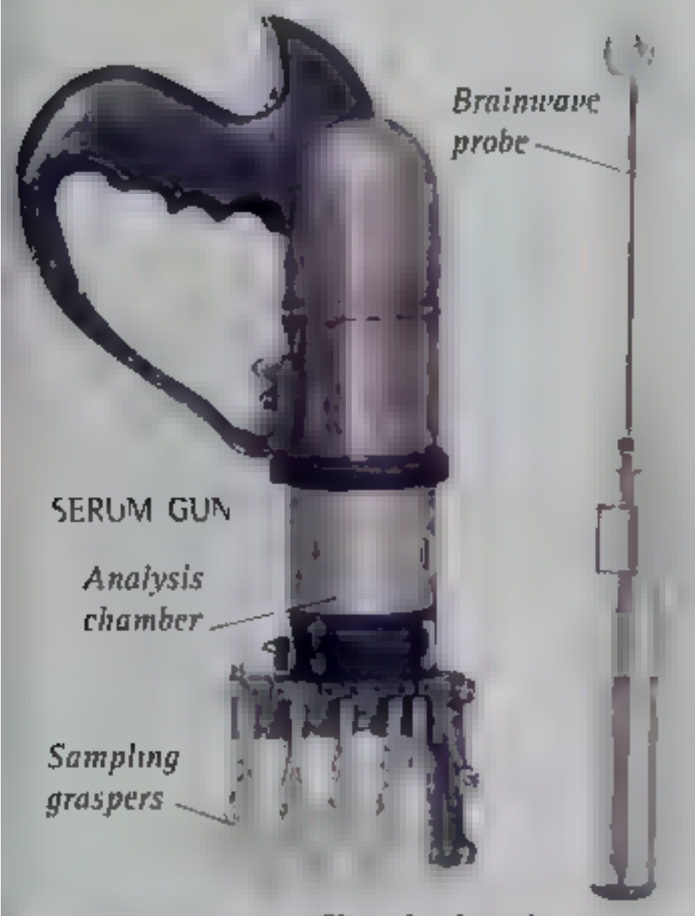
Accelerated Learning

Clone youths grow at twice the rate of ordinary humans, so they crave information but receive only half the normal time to assimilate it. This loss of life-experience is compensated for by a learning program that focuses more on military knowledge than on academics. In addition, special equipment modulates brainwaves and enhances the clones' ability to retain instruction.

Maintaining Perfection



The Kaminoans strive to control every aspect of the clones' existence for perfect regularity, but slight deviations occur in the development of any living individual's biochemistry. Chief Scientist Ko Sai inspects the clones at every stage of life to identify those who have drifted from the standard. Aberrant clones are given extra conditioning to regularize them.

Cord used for symbolic honor training

Clone birth pod

The Kaminoans' dedication to perfection has led to methods of absolute sterilization and ultraclean surfaces so the clones are not in any way tainted with imperfections. Such standards are extraordinary for so vast an enterprise, and Obi-Wan Kenobi is astonished.

Batches of clones are trained in an environment with exactly enough semblance of community to make them emotionally stable. Physical skills are imparted through learning devices and are perfected through practice.

Blank character and accelerated growth shape clone face slightly differently from clone-source

Developed Clone

The stress of accelerated physical, mental, and emotional growth could easily drive a clone insane. To counter this and produce sound soldiers, the Kaminoans provide a highly disciplined environment and a rigorously balanced development program. At a physical age of just ten years, the clones are fully developed and ready for battle, though they cannot be said to have normal personalities.

As "adults," the clone troopers resemble their source, Jango Fett. Fett lives on Kamino and helps train the troopers, knowing better than anyone how to guide their development and impart military skills to the copies of himself.

DATA FILE

◆ The Kaminoan cloners recondition an average of seven aberrants for every two hundred clones produced, maintaining superb standards.

◆ Ordinary soldiers might become claustrophobic when sealed into armor, but clone troopers are trained to wear it for extended periods.

Clone Trooper Equipment

CLONE TROOPER armor and equipment is based in part on the battle gear of the Mandalorian "shocktrooper" supercommandos, of whom Jango Fett is a survivor. Fett's light armor inspired the heavy-duty shell completely covering the clone trooper. Replacing the Mandalorian flightsuit is a pressurized black body-glove that protects against acrid vapors or even the vacuum of space. The distinctive shocktrooper "T" visor plate is adapted with an enhanced breath filter for optimal operations under the often poor environmental conditions of battle. Together with their superb training and conditioning, clone troopers feel virtually invincible with this panoply.

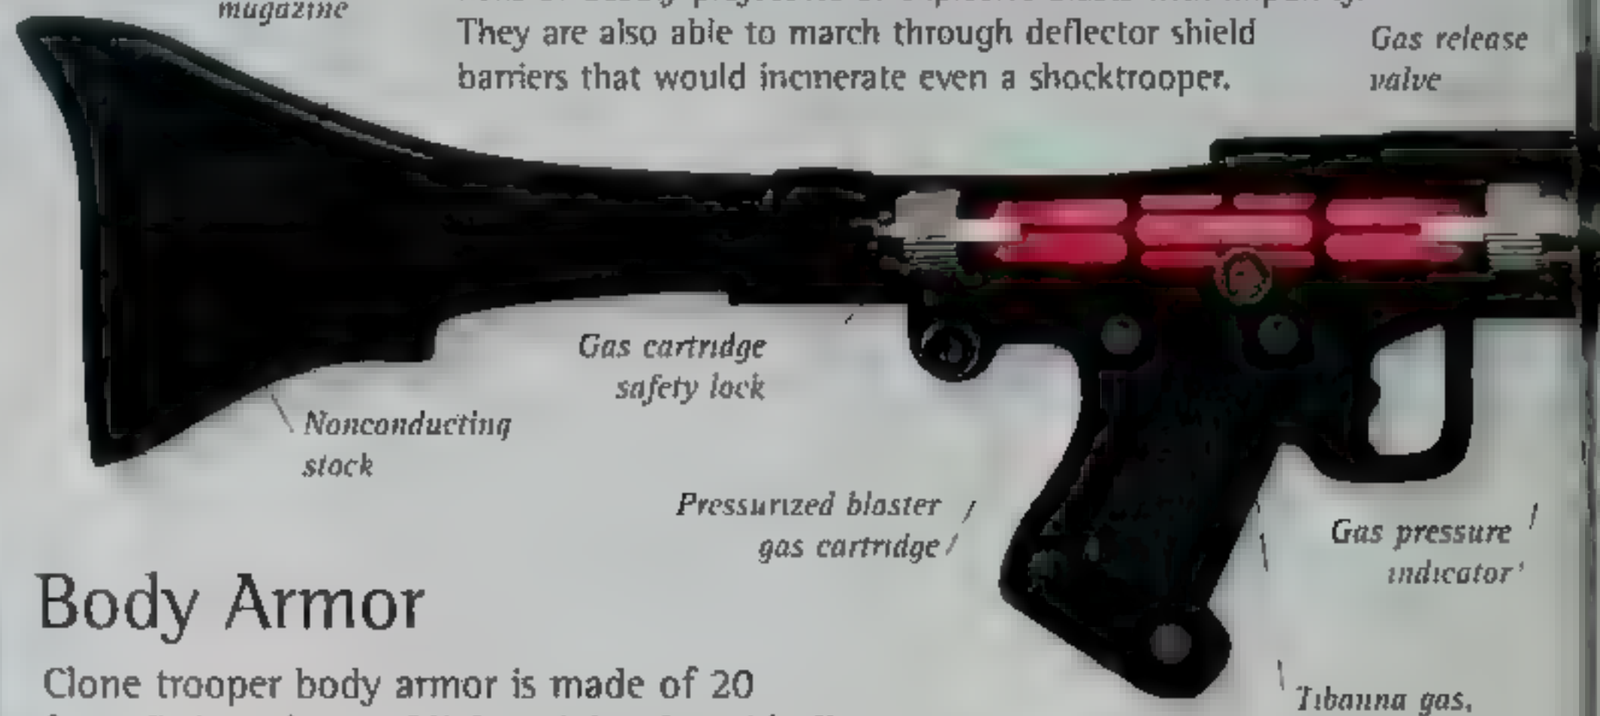
Outfitted in their extraordinary gear, clone troopers can withstand hails of deadly projectiles or explosive blasts with impunity. They are also able to march through deflector shield barriers that would incinerate even a shocktrooper.



Body Armor

Clone trooper body armor is made of 20 form-fitting plates of lightweight plastoid-alloy composite. Troopers receive and send battle status signals via communication equipment contained in their helmets. Fabricated by an alien species with a limited knowledge of human ergonomics, the armor allows reasonable freedom of movement in combat, but is uncomfortable to sit in when troopers pilot vehicles. Future versions and upgrades of this body armor will undoubtedly include improvements in this respect.

DATA FILE

◆ As the clone-source for the entire clone-trooper army, Jango Fett cooperated in devising the design of the armor, based on his combat experience.

◆ Republic assault ships transport the gunships that deploy clone troopers under heavy fire protection.

Battle Gear

Vital combat transports and fighting machines have been developed alongside the clone troopers. This new equipment expresses the battle philosophy of the clone army: It is built for heavy use and the unleashing of maximum-effort assaults without warning. These approaches differ from the forms of battle seen throughout the galaxy for thousands of years, in which armies deployed their strength cautiously over long periods.

Jango Fett—Bounty Hunter

Jango's reputation enables him to hire stringers, wisely minimizing his own risk. He often works with Zam Wesell, to whom Jango assigns the dangerous job of assassinating the Senator for Naboo.

AFTER THE MURDER of his parents, Jango Fett was adopted and raised by the legendary Mandalorian warrior army, a mercenary group who earned a reputation as the most formidable supercommandoes in the galaxy. The Jedi destroyed this dangerous force, but Fett survived and continues to wear the armored, weapon-filled uniform that helped make the Mandalorians a dreaded name. Keeping himself in top condition and training often with his equipment, Jango Fett combines physical and tactical skill with a prudent intelligence that is a rare attribute in the bounty-hunting community.

In battle with Kenobi, Fett soon appreciates the seemingly supernatural abilities of the Jedi. Jango must quickly re-assess his tactical situation before Kenobi gains the upper hand.

Mandalorians who could afford it commissioned backup suits of their armor. Fett has replacement armor for much of his suit, with additional items that can be fitted for particular mission profiles. Designed for brief but intense surprise attacks at close range, the pistols are made of an expensive dallorian alloy, which can withstand sustained-fire heating that would melt an ordinary gun.

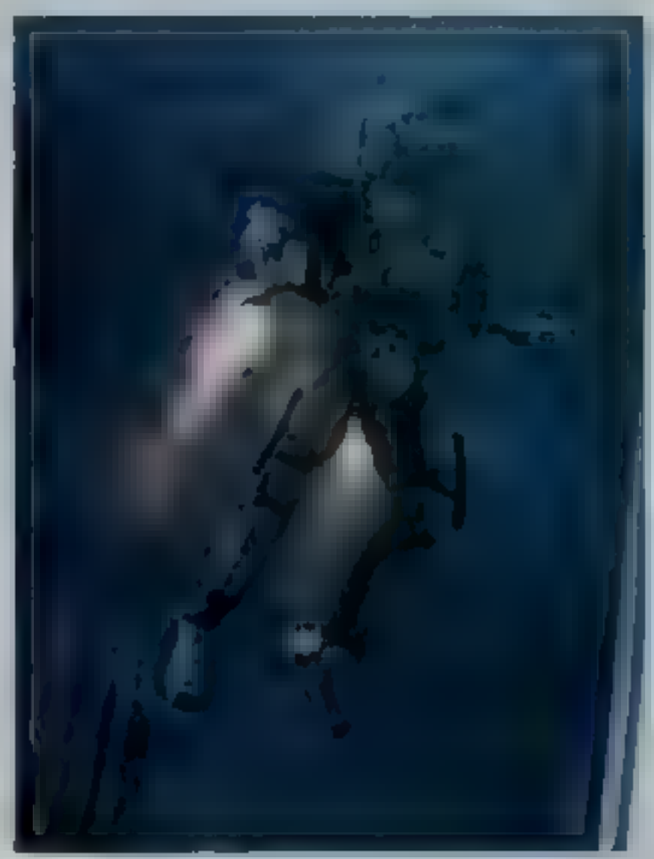
LOCK BREAKER

Realizing that Kenobi is a formidable opponent, Fett launches his jetpack missile set for explosive charge. The missile can be optionally locked dead as a grappling hook. Set to explode, it would kill any ordinary humanoid, but will it kill a Jedi?



Never governed by passions or panic, Fett coolly calculates his every move, always playing to win or survive. He knows when to make use of evasion and thus outlasts both rivals and opponents.

JETPACKS

Fett's gear includes two models of jetpack, one more heavily armored and carrying a larger-bore missile

Professional

Raised in a brutal frontier environment on Concord Dawn, Fett is tough and self-reliant. He has worked out his own sense of morality which is honorable by his standards. He keeps his bargains and he earns his pay. As a bounty hunter, Fett has become so professionally formidable that planetary governments are known to hire him.

ENTRY KEYPAD

THE MANDALORIAN WAY lives on in the bond between Jango Fett and his son Boba. Growing up at his father's side, Boba has learned the value of superior training, judgement, and weaponry. To Boba, Jango stands above the greed and betrayal encountered in the underworld, and is a man of honor who is unfailingly truthful with him. To young Boba, Jango Fett is father, family, ideal, and hero, the greatest of the Mandalorians and the image of his own destiny.

Jango maintains a Spartan apartment on Kamino. He uses it as a safe house for himself and his son, far from the dangerous entanglements of his professional life.

Like Father, Like Son

In Mandalorian tradition, fathers were responsible for training their sons in combat skills. At age 13, boys had to face the trials of manhood. Although these rites could be fatal, actual deaths were extremely rare because candidates were so well prepared. The close father-son bond, built on respect, trust, and discipline, produced highly capable and confident individuals.

The Lars Family

MUSHROOM JAR

TATOOINE'S moisture farmers survive in territories most other people consider uninhabitable. In their search for an independent existence away from the overcrowding and often slave-like employments of the Core Worlds, the Lars family have made Tatooine's barren desert their home. Rendered close-knit by the dangers and hardships they all face, the Lars family and the moisture-farming community band together against the native Tusken Raiders. Pioneer settler Cliegg Lars earned his farm by a homestead claim, raising his son Owen on the great salt flats, together with his second wife, a former slave named Shmi Skywalker.

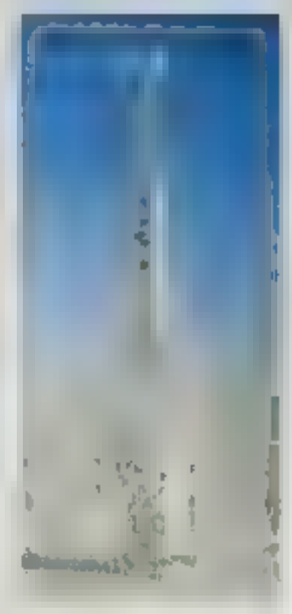
Moisture farms on the salt flats of Tatooine use arrays of vaporator towers spread out across vast distances to extract minute amounts of water from the atmosphere. A precious commodity on the desert world, water can be used for barter, for sale, or for hydroponic gardens. Homesteads are dug into the ground to provide respite from extreme temperatures.

Owen never expected to meet his step-brother, Anakin, knowing that Jedi must sever their family ties. When Anakin arrives, Owen has mixed feelings about his more worldly relation who left his own mother to become a Jedi.

Owen and Beru

The small town of Anchorhead provides a nexus for the moisture-farming community of the Great Chott salt flat. There, Owen Lars met Beru Whitesun, his girlfriend. Beru's family have been moisture farmers for three generations, making them among the settlers most thoroughly adapted to Tatooine life.

The Lars' kitchen is a simple, functional space built around the basic concern of conserving moisture. Food is never left out for long, and moisture traps are built into the self-sealing cabinets.



DATA FILE

- Owen Lars was born to Cliegg Lars and his first wife Aika before Cliegg left the Core World of Ator.
- The Lars family maintains an array of some 63 water vaporators spread out across the flat desert around the homestead, making their farm a relatively small one by Tatooine standards.

C-3PO

Anakin Skywalker built the working skeleton of C-3PO out of scrounged droid parts when he was just a boy and still a slave. Two years after her son's departure, Shmi Skywalker acquired a set of old droid plating from her then master, Watto. Shmi installed the plates to help the droid last longer in the sandy environment.

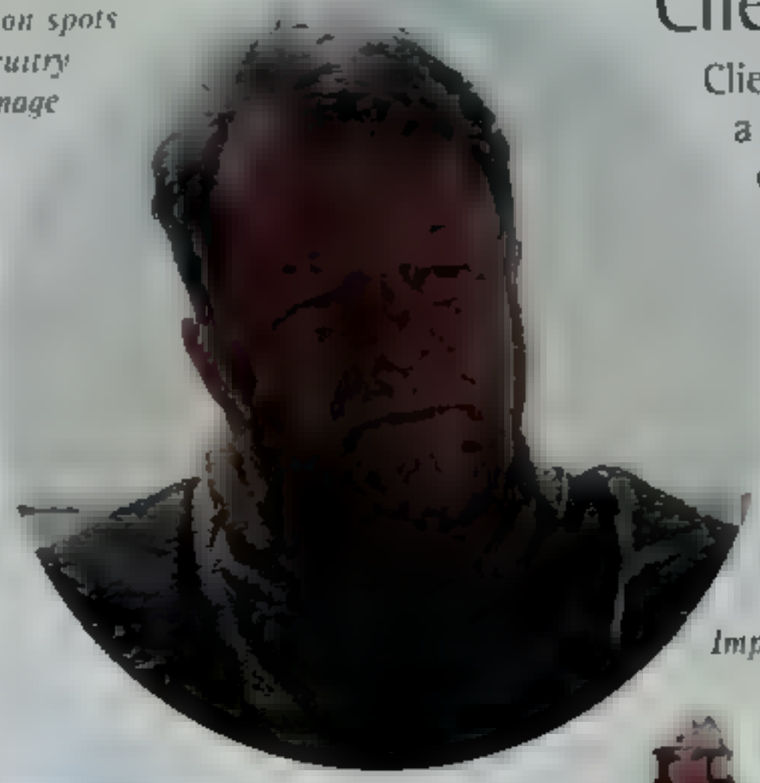
Cliegg Lars

Cliegg Lars left behind life in a cramped garret within a centuries-old Core World skyscraper to run a farm on Tatooine. Looking for a farmhand, instead he found a woman whom he fell in love with. In order to marry Shmi, he bought her freedom from Watto, the junk dealer.



Improvised protective gear

When Shmi Skywalker is kidnapped by Tusken Raiders, a posse of moisture farmers go in search of her. But these peaceable folk are little prepared to face the savagery of Tusken Raiders.

Mechno-Chair

When Tusken Raiders ambush the nearly defenseless settlers who attempt to rescue Shmi, Cliegg Lars' leg is cut off by a lethal trick-wire. Refusing to be fitted with a mechno-leg, Cliegg is confined to a power chair.

Facing Loss

After the Tusken tragedy, some wonder whether the moisture farming community will be abandoned. With the death of Shmi, Cliegg Lars has lost as much as anyone, yet he remains determined to live out the life he has worked so hard to create.

Tusken Raiders

TATOOINE'S NATIVE Tusken Raiders, or Sand People, are violent enemies of the moisture farmers, with whom they compete for precious water sources on the desert planet. These fearsome creatures are often larger than humans yet they blend into the landscape with baffling ease, allowing them to move almost invisibly. Sand People live in tribal clans loosely scattered across the dunes and canyonlands of Tatooine. They travel lightly and possess few objects, the most treasured of which are the skulls of their ancestors and Krayt Dragon pearls. Sand People are reputed to slay anyone foolish enough to come near their sacred wells.

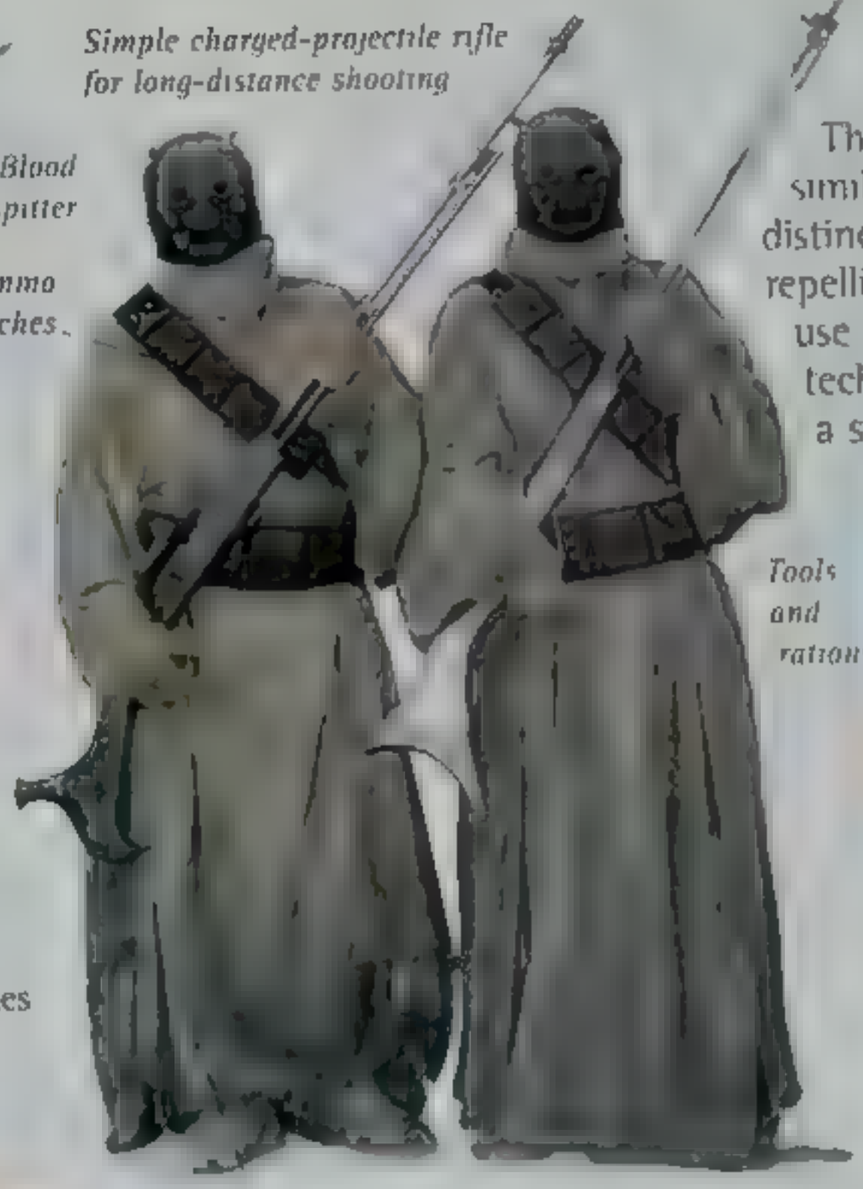
Shrouded In Mystery

Tusken Raiders are strongly divided along gender lines. Females maintain the camps while the males hunt and fight. Sand People keep their flesh carefully covered, only revealing it on their wedding night. For any other exposure of skin, even accidental, Tusken Raiders are banished or killed, depending on the tribe.

WARNING POSE

GADERFFI
The Sand People's traditional weapon is the gaderffi, or "gaffi" stick. These dreaded axes are made from krayt dragon horn and spacecraft plating salvaged from desert wrecks.



Sand Gear

Throughout their desert range, Sand People wear similar gear, although each tribal clan has its own distinctive details. Some groups wear a kind of sand-repelling capsule around their necks, while others use simple scarves. Raiders reject most advanced technology, but will take horrific advantage of a stolen blaster gun until its power is spent.

Tusken Raiders can hide even in the featureless landscape of the salt flats, where they sometimes lie in wait to kidnap or kill moisture farmers who come out to tend their vaporators.

Sand People make a few basic items such as stoves from scavenged and stolen metal. More complex devices are usually taboo.

Tusken Uli-ah

Sand People children, called Uli-ah, wear unisex garments that hide all flesh. These traditional clothes protect Uli-ah from sun, sand, and wind, and conserve precious moisture. Young Tusken Raiders lack full tribal acceptance until they complete a rite of passage at age 15.

Count Dooku

In the droid foundries of Geonosis, the Count hopes to have found the anvil upon which he can forge the sword of the Republic's undoing.

THE DANGEROUS AND ELEGANT Count Dooku was once a Jedi Master of great repute. He left the Jedi Order after the Battle of Naboo, returning to his homeworld of Serenno and his family title of Count. By protesting the failure of galactic government, Dooku has swayed many systems to the Separatist movement, which seeks independence from the Republic, but his real motives lurk in darkness. The Count has always wielded considerable power—by natural authority, by lightsaber, and now by wealth and persuasion. This double-dealing master of the Force has taken a place at the heart of galactic events and he threatens the very survival of the Republic.

Cape enlarges Count's silhouette to intimidating effect

Dark Alignment

Although Dooku joined the Order at the usual age, he never fully gave it his inmost allegiance. He maintained a streak of independence, which he transmitted to his pupils, including the late Qui-Gon Jinn. Dooku's considerable strength in the Force made him enigmatic even to Yoda, and there were whispers that he experimented with Sith teachings, using a dark Holocron kept in the Jedi Archives. The Council underestimated Dooku's interest in power.

DATA FILE

◆ Dooku's teacher was Yoda. The great Jedi Master hoped, with careful teaching, to overcome the effects of Dooku's persistent independent spirit.

Dooku's Lightsaber

As a Jedi Master, Count Dooku set aside the lightsaber he built as a young Padawan and created a superior one, as Jedi sometimes do. In creating his personalized design, he chose a configuration that had no connection to that of his master, Yoda, nor to the style in fashion at the time. Instead, he studied Jedi Archives records to create a lightsaber of the type that was standard in the heyday of Form II lightsaber combat. Form II is an ancient technique that favors long, elegant moves and incredible deftness of hand.

Dooku tempts the captured Obi-Wan Kenobi with an offer to join him in the Separatist movement. The Count subtly uses the Force to probe Obi-Wan's spirit for inner weaknesses.

The Lost Twenty

Only 20 individuals in the history of the Jedi Order have ever renounced their commissions. Their leave-taking is sorely felt among the Jedi, who memorialize them with portrait busts in the Archives. Count Dooku is the most recent of the "lost" ones. He is considered the most bitter loss because the Force was so strong in him.

The curved hilt of Dooku's lightsaber allows for superior finesse and precise blade control. This design gives Dooku an edge when facing Jedi, who have mostly trained to use lightsabers to deflect blaster bolts.

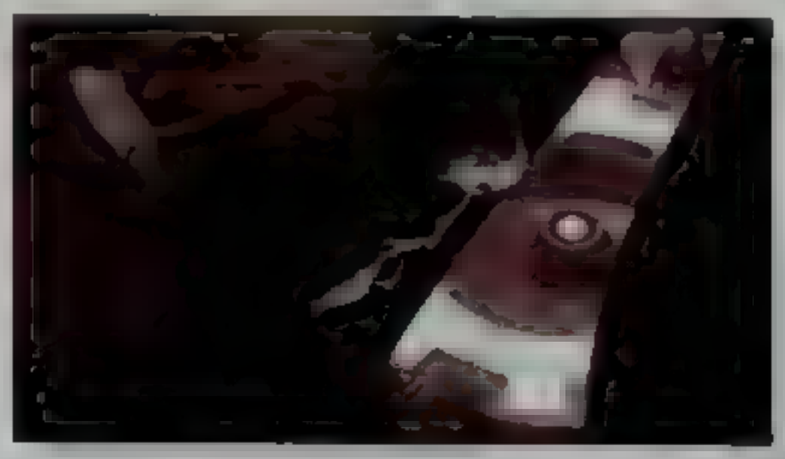
HOLOPROJECTOR
After he left the Jedi Order, Dooku was no longer able to use the Sith Holocron in the Archives. He now studies holographic cells containing mystic teachings of shadowy power

When the arrival of the Jedi forces spoils his primary plans, Dooku uses one of his several means of escape—a small, open-cockpit speeder bike.

Dooku reveals the full measure of his dark nature when he casts legendary Sith lightning. Virtually impossible to deflect, Sith lightning causes excruciating pain and weakens life. The Jedi possess no exact equivalent to such an evil use of the Force.

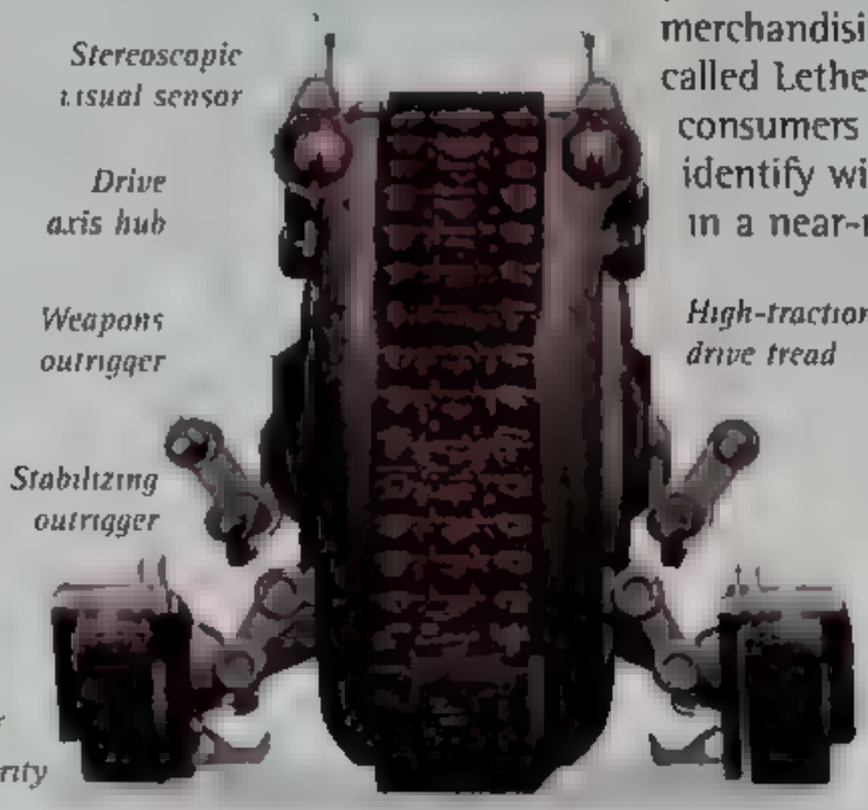
The Separatists

COUNT DOOKU'S CALL for independence from the decaying and increasingly corrupt Republic is answered by some of the most significant and authoritative factions in the galaxy. Among them stands a sinister gathering of commercial empires and megacomglomerates, whose power could rival that of the Republic itself. Disaffected and opportunistic Senators also support the Separatist movement. The political system was never constructed to deal with the rise of corporate superpowers, whose motives and morals focus on profit alone. Without decisive support from the Galactic Senate, the Republic's very structure is in danger of being undermined.

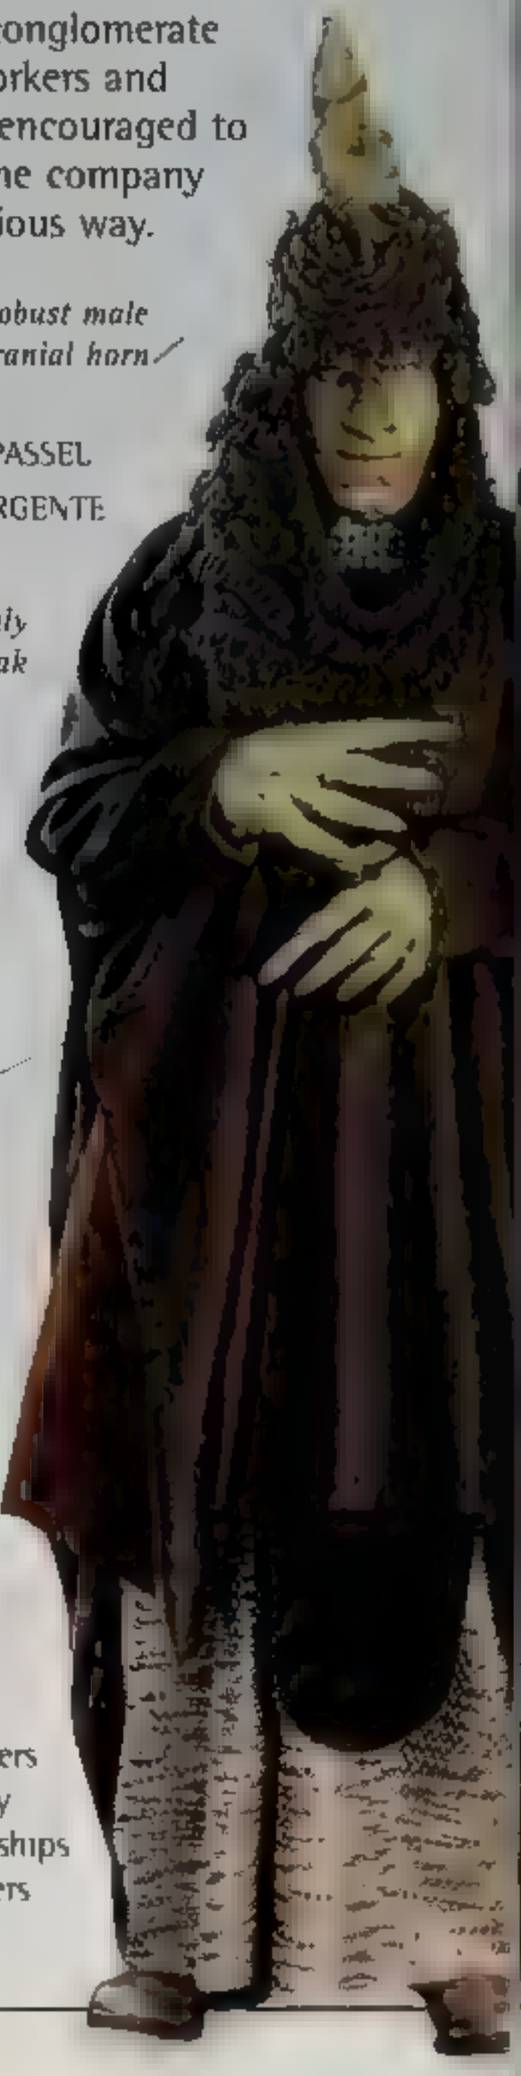


The Corporate Alliance

The Corporate Alliance is the negotiating body for the galaxy's major commercial operations. As head of the largest corporation, Passel Argente commands the office of Alliance Magistrate. Argente has risen to great heights of wealth and power as chairman of the merchandising conglomerate called Lethe. Workers and consumers are encouraged to identify with the company in a near-religious way.



CORPORATE ALLIANCE TANK DROID
When Alliance corporations face resistance to their development plans, Tank Droids are used to clear the way. The wheel like machines are widely feared.



The Trade Federation

The Trade Federation controls freighters, ports, and way stations on the galactic commerce routes. Its power is profitably supported by a droid army, which operates under the guise of "securing the lines of trade." Trade officials appear immune to prosecution for their brutal intimidation.

TRADE FEDERATION CORE SHIP
Large Trade Federation freighters are not designed for planetary landings. However, the core ships can detach from the freighters and descend on their own.

The Commerce Guild

The Commerce Guild seeks to control any large corporation involved in raw materials. Increasingly, it enforces tribute payments with its private army. The Guild maximizes profit by stifling alternative technologies and bribing corrupt officials and Senators to control market forces with tariffs.

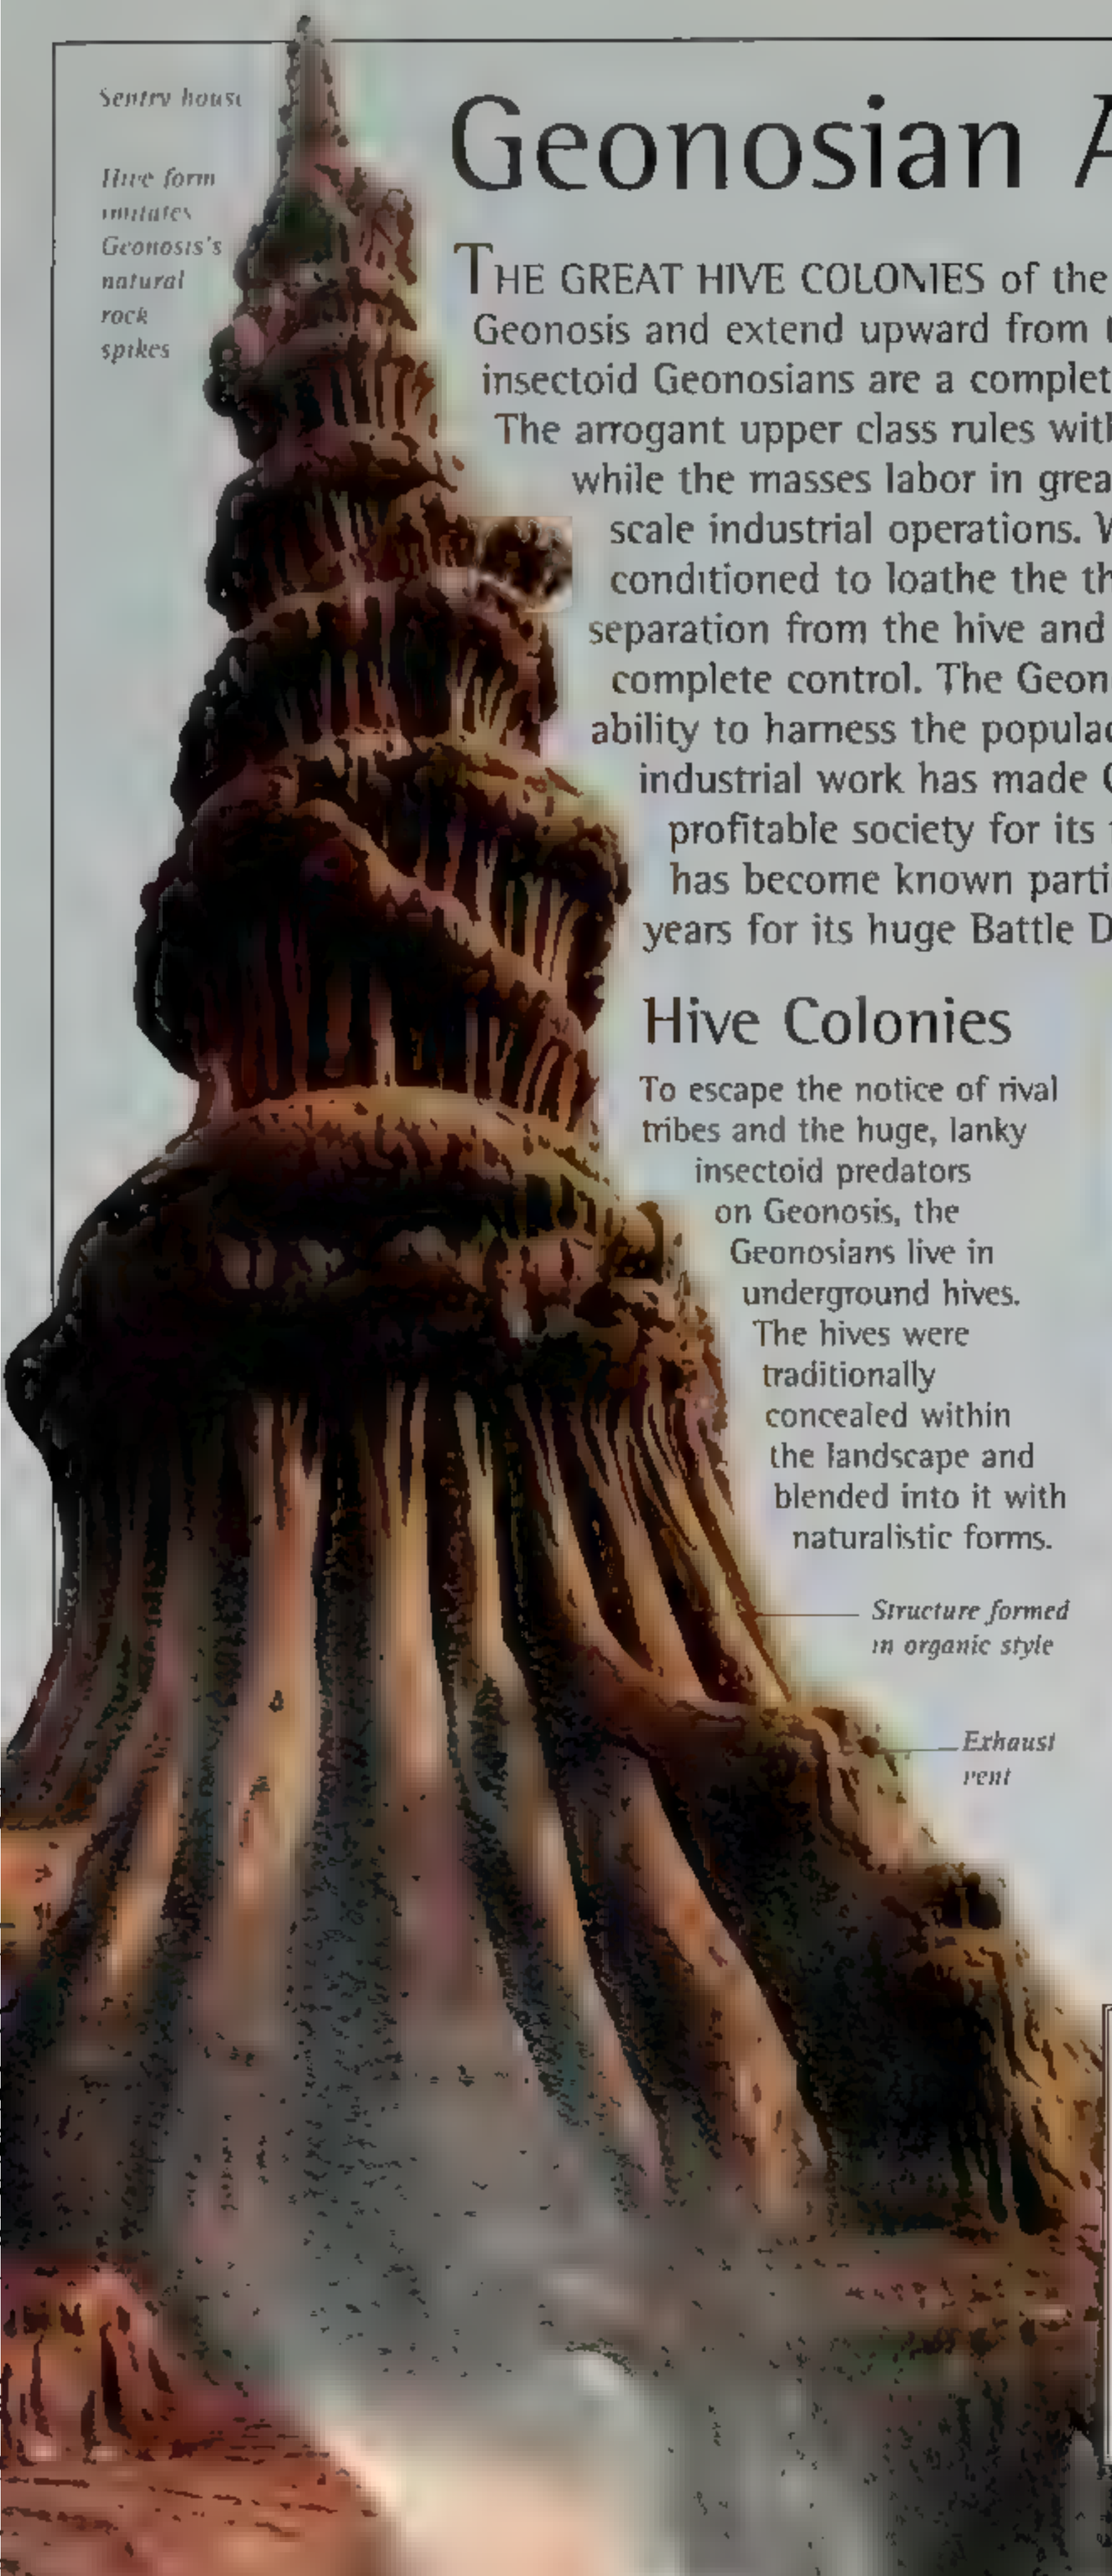
Geonosian Aristocracy

THE GREAT HIVE COLONIES of the sentient Geonosians teem beneath the surface of Geonosis and extend upward from the barren landscape like strange towers. The quasi-insectoid Geonosians are a completely caste-segregated society. The arrogant upper class rules with savage authority, while the masses labor in great swarms at large-scale industrial operations. Workers are conditioned to loathe the thought of separation from the hive and its systems of complete control. The Geonosian aristocrats' ability to harness the populace for harsh industrial work has made Geonosis a very profitable society for its rulers. The planet has become known particularly in recent years for its huge Battle Droid foundries.

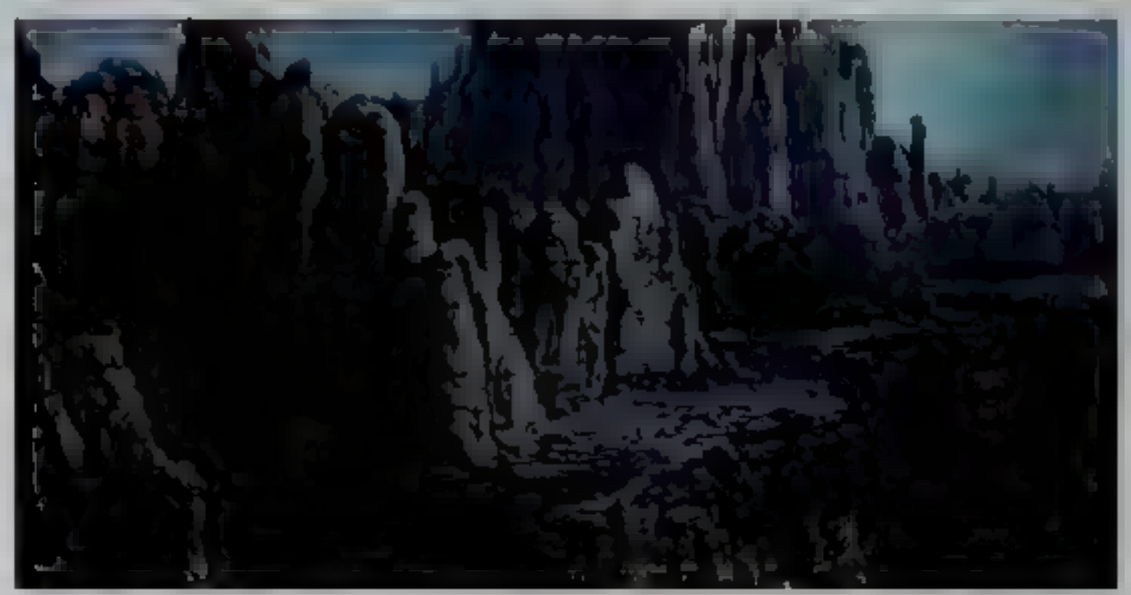


Hive Colonies

To escape the notice of rival tribes and the huge, lanky insectoid predators on Geonosis, the Geonosians live in underground hives. The hives were traditionally concealed within the landscape and blended into it with naturalistic forms.

A ring system of small asteroids surrounds the planet Geonosis. The asteroids are rich in metals, forming a huge resource of raw materials for the manufacturing operations on the planet below

Dense high-altitude fog on Geonosis produces gloomy, night-like conditions that may last for weeks. Geonosian life is adapted to these circumstances, and many creatures are bioluminescent.



Geonosian society exists for the benefit of the few in the upper caste. Ruling members think nothing of forcing thousands of workers to labor for their whims. They have overseen the creation of the spectacular architectural realm in which they all live, adapting forms they once built by instinct into more refined, spire-like structures.

The tremendous income from these projects has secured Poggle's power, but this situation could change, as it has done in the past. Trade Federation Battle Droids

Standard Trade Federation Battle Droids are still in use having proven effective at policing subject populations.

THE WEALTHY TRADE FEDERATION is a key faction in the Separatist movement, supplying its army of Battle Droids. The Trade Federation's defeat in the Battle of Naboo made clear the need for stronger, more independent infantry forces, and thus the Super Battle Droids were commissioned as improvements on their standard, skeletal-form predecessors. Like the terrifying droideka, these military-grade robots violate Republic regulations on private security forces, but the Neimoidians have too much influence to fear the galactic courts. Count Dooku himself arranged the deal in which a large force of Super Battle Droids are being secretly manufactured within the droid foundries of Geonosis, building even greater power for the Separatists.

Geonosian Drones

LEGIONS OF DRONES serve the Geonosian aristocracy and live within the rigid dictates of hive society. The three biologically distinct castes of drones have been further altered by genetic modification and selective breeding to produce drones specialized for many roles inside the hive. Drones have few rights, limited exercise of free will, and are executed with little concern if they prove aberrant, as there are always more to take their place. For the average drone, with its limited mentality, such a life of communal work is the only one it would want.

Geonosian sentries stand guard against hive invaders, which may be large verminous creatures or drones from rival h ves. Geonosian intruders may be seeking to raid them, sabotage their works, or shift the balance of power by assassinating rulers

Drones have no rooms, possessions, or personal space of their own. To conserve resources for Geonosian rulers, drones may be ordered into sleep-like stasis when they are not needed, reducing their requirements for food and space.

Rather than sacrifice hive resources to support prisoners, Geonosians make captives serve as public entertainment in the arena, where they are subjected to combat against vicious beasts or each other. These entertainments reinforce the power of Geonosian rulers and pacify the drone masses with violence.

SOLDIER WINGS
Adult Geonosian soldier drones have functional wings and can fly and hover for short intervals. Lighter youths can fly farther and are used as scouts. Minor bodily specializations occur among the castes of Geonosian drones, all but the soldiers having only vestigial wings.

Geonosian Soldier Drone

Grown to adulthood rapidly, Geonosian soldier drones can be ready for combat at an age of only six standard years. Soldier drones are tough and single-minded, biologically adapted for a warrior life. They are conditioned to act en masse with a fearless and stubborn mentality. They make good defenders and strong fighters against brute beast opponents but poor attackers when faced with intelligent enemies in the field.

SONIC BLASTER
The standard sidearm of a Geonosian soldier uses oscillators to produce a devastating sonic ball. A tiny plasma containment-charge is added upon firing to stabilize the sonic effect until it impacts upon its target, causing great destruction.

Arena Beasts

CONDEMNED PRISONERS and gladiators face a terrifying array of monsters in the Geonosian arenas. Common criminals are strung up or let loose with the beasts, which are released from underground hive pens. Many of these creatures behave in predictably gruesome and crowd-pleasing ways, and some are trained by their keepers to maximize their more hideous behaviors. The most crowd-pleasing spectacle is saved for last, when rare beasts from far-flung star systems are released into the arena to savage criminals deserving of special attention.

Acklay are prized arena specimens because they are very difficult to capture. They starve if not fed often, giving them an appetite for many arena kills in a single day.

The nexu seizes prey in its broad, toothy mouth, then bites and shakes the creature to death. Sharp quills on the nexu's back discourage attack from above.

Jedi in Battle

JEDI KNIGHTS use their powers of subtle perception to resolve conflicts through negotiation and diplomacy. They seek peace through justice, knowing that true harmony can rarely be forced upon a situation. Nonetheless, mystical philosophy has never blinded the Jedi to the practical need for force in intractable situations, and the most studied Jedi diplomats are capable of drawing their lightsabers in an eyeblink when crisis demands it. When war preparations are discovered on Geonosis, Mace Windu is quick to act, leading a Jedi expedition of all available fighters to rescue Obi-Wan Kenobi.

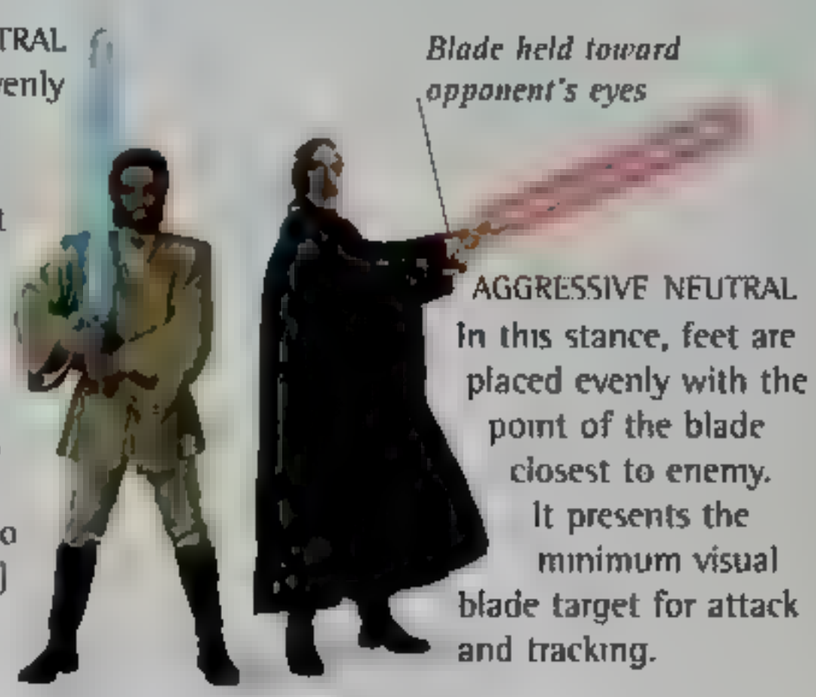
Lightsaber Combat

THE LIGHTSABER is a powerful symbol of discipline as well as a weapon. In the hands of the untrained, the lightsaber is worse than useless against modern blasters, and may even injure its user. But in the hands of a Jedi, the lightsaber can become as powerful as any weapon turned against it, deflecting energy bolts back at attackers in a deadly hail and leaving the Jedi wielder untouched. In its highest form, lightsaber combat becomes a subtle and intricate art, but every Jedi begins by learning its first principles.

THE SEVEN FORMS
Seven forms of lightsaber combat have been developed since the foundation of the Jedi Order. Each represents a distinct approach or philosophy, and has its particular strengths. Jedi may specialize in dedication to a particular form or build their own fighting style with elements of multiple forms, although this takes special discipline

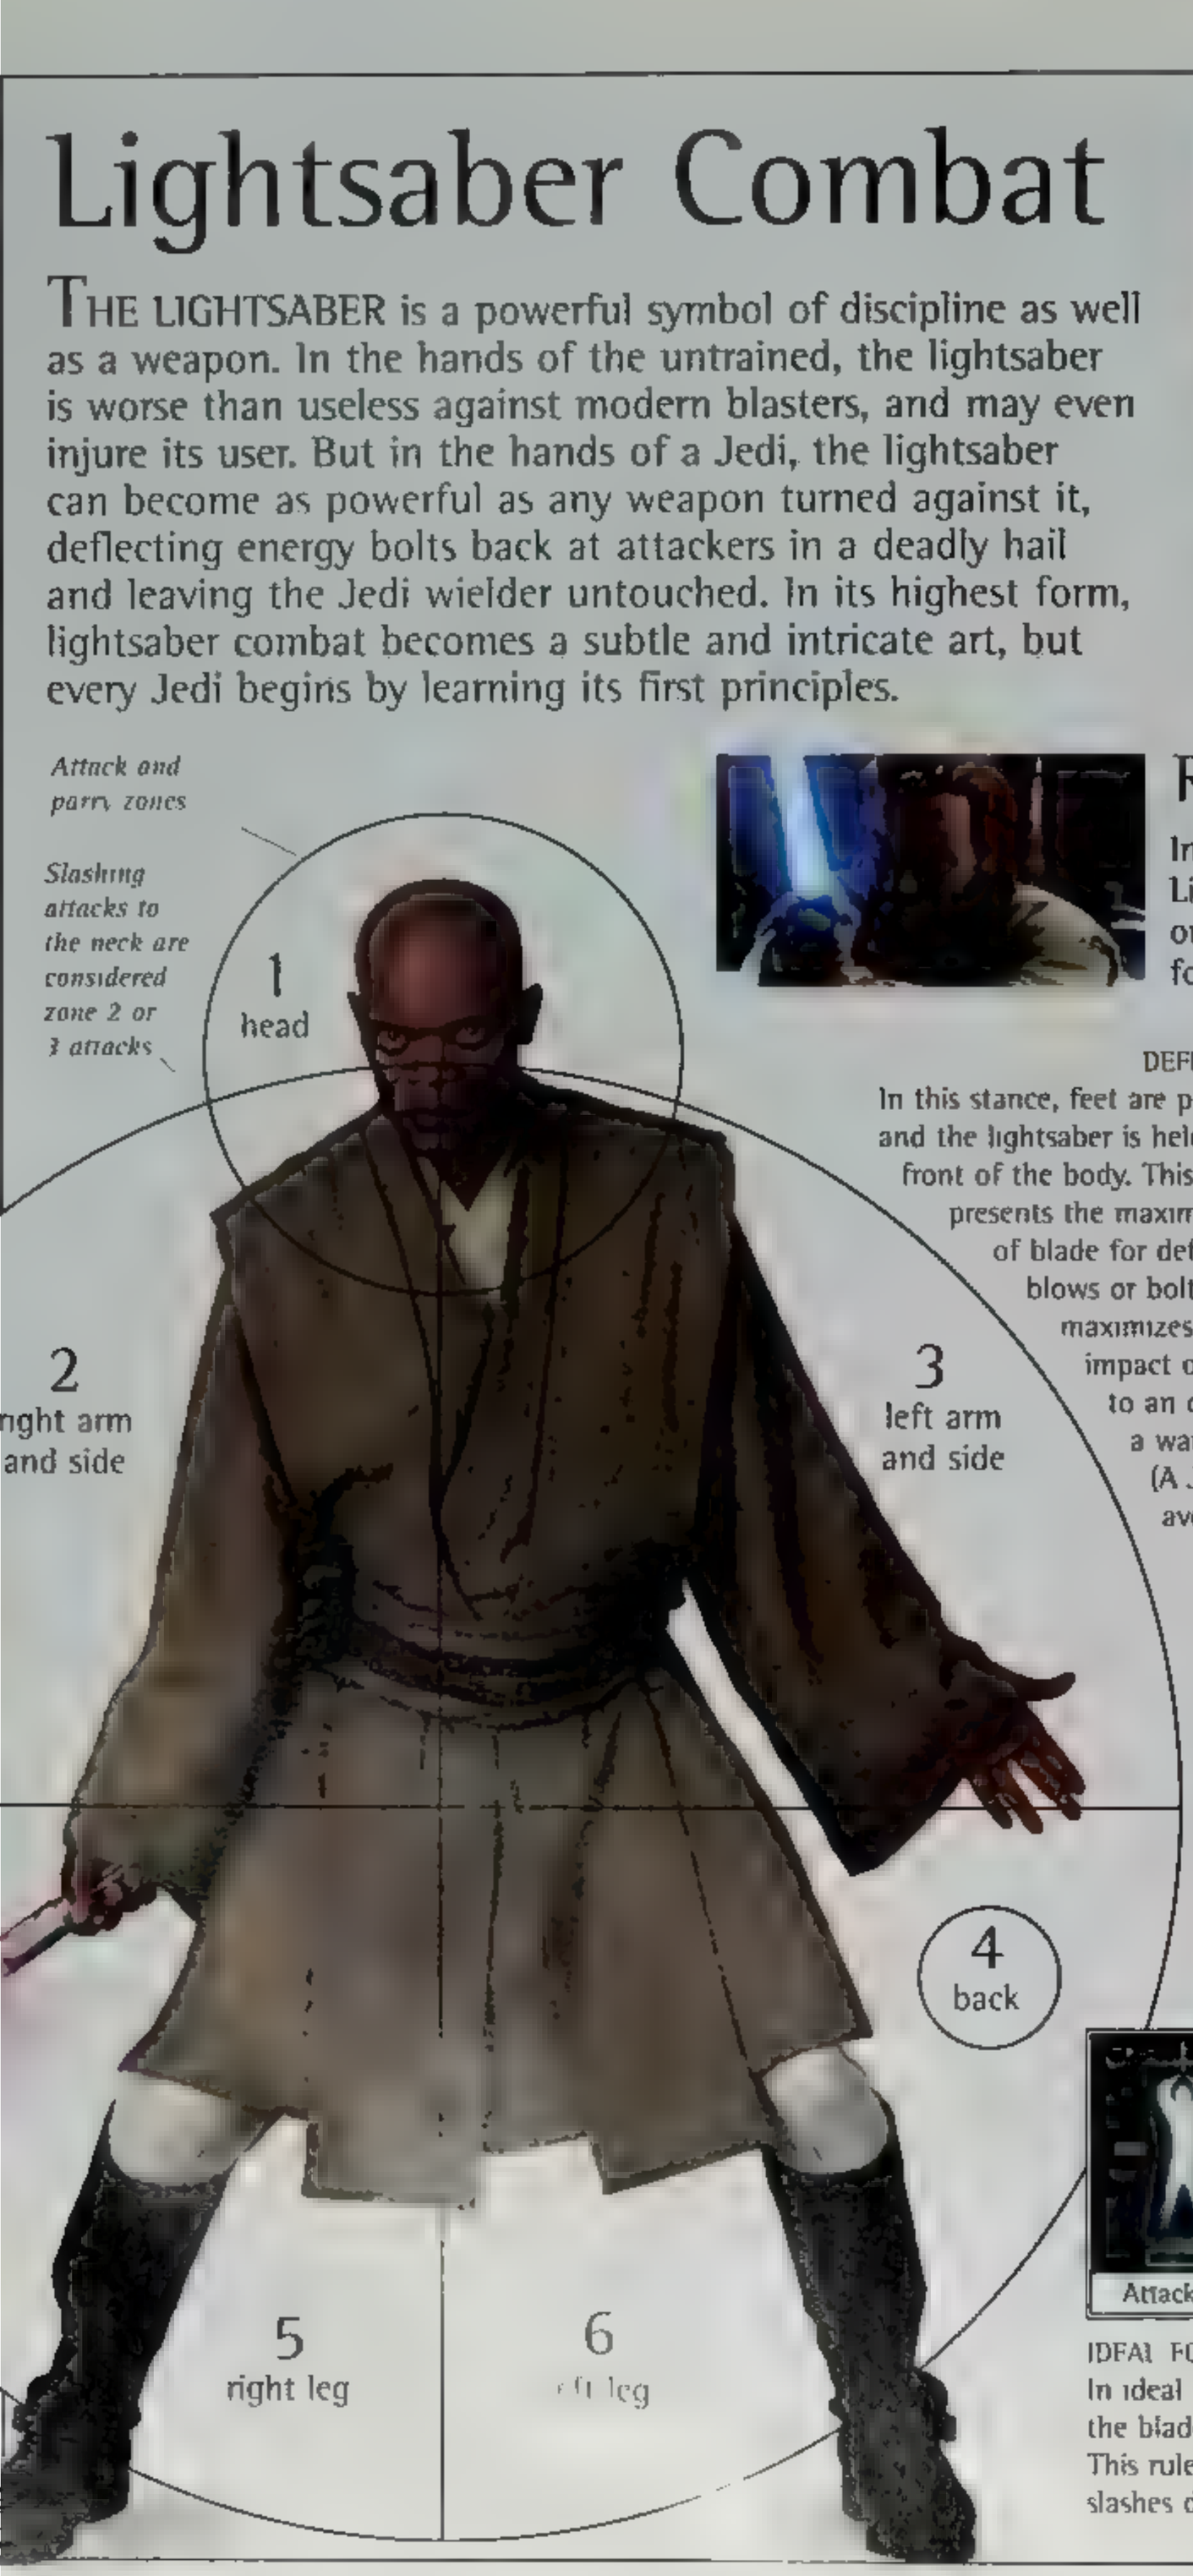
Ready stances

In a ready stance, a Jedi is prepared for combat. Lightsaber forms include many ready stances, but the one called "Jedi ready" is the most common: dominant foot back, blade held in parry position on dominant side.



DEFENSIVE NEUTRAL
In this stance, feet are positioned evenly and the lightsaber is held upward in front of the body. This position presents the maximum amount of blade for deflection of blows or bolts, and maximizes the visual impact of the blade to an opponent as a warning sign. (A Jedi hopes to avoid conflict.)

AGGRESSIVE NEUTRAL
In this stance, feet are placed evenly with the point of the blade closest to enemy. It presents the minimum visual blade target for attack and tracking.



Body Zones

Attacks and parries are described in terms of the body zone they concern. "Attack 1" is a blow to the opponent's head, "parry 2" the block of an attack to your right arm or side, and so on. Attack zones are those you see on your opponent, while parry zones are those of your own body. So to go from attack 3 to parry 3, your blade must move from your right side to your left.

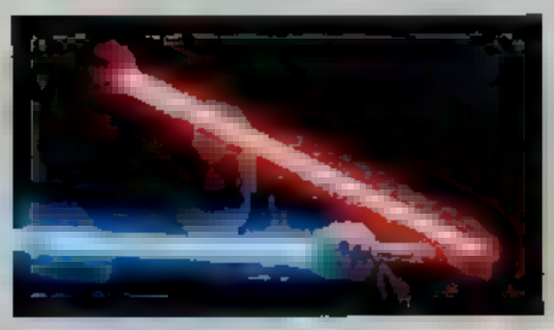
IDEAL FORM
In ideal form, attacks are horizontal side swipes and parries are made with the blade upright, pushing the point of the enemy's blade safely away. This rule is reversed for attack and defense of the head, where the attacker slashes down and the defender holds his blade parallel to the ground.

VELOCITIES
To develop lightning reflexes and tight control, Jedi face each other in drills called velocities. The tenth velocity sequence takes each opponent through a series of attacks and parries and is repeated in turn at ever greater speed until one opponent is felled or yields with the declaration, "Solah!"

Two-handed grip gives best control

Foundations

Jedi in training run lightsaber velocities endlessly to increase their key skills and physical stamina. Building on these basics, Jedi can go beyond what is physically possible, allowing the Force to flow through them. A Padawan practices for the trials of passage using dulon: Solo sequences of moves in which the opponents are only envisioned. The patterns of velocities and dulon prepare a Jedi for the unpredictable realm of live combat.



The Sith use synthetic lightsaber crystals, which generate a stronger blade when energized by the dark side of the Force. The advantage is slim, but the very appearance of a red blade is a symbol of hateful power.

LIVE COMBAT FORM
In contrast to ideal form, in live combat, blade attitude for attack is often angled downward to minimize body movement and increase speed. But keeping in mind the ideal distinction between attack and defense attitudes improves precision.

Push-down parry 3

In advanced lightsaber combat, the Force plays a role larger than physical skill alone. Combatants use Force powers for attack and defense, while Sith attempt to break a Jedi's inner spirit

(As Don Bies has observed, the man truly paints with light), ILM master modelmakers Don Bies and John Goodson, for [illegible] Holocrons and the clone trooper [illegible] Lucasfilm master sculptor Robert [illegible] creature models for this book that [illegible] to bite us; John Kelly, for digital [illegible] clone trooper rifle cutaway and [illegible] combat sequences; digital [illegible] Cyberdyne Laboratories' Ed Endres, whose [illegible] work made it possible for me to explore the [illegible] body armor like a clone trooper; Cynthia O'Neill Collins and Cathy Tincknell at DK for kindly supporting the effort it took to make this project happen.

And as always the team at Lucasfilm: Lucy Autrey Wilson, for encouraging backstory coordination to make this project the best it could be; Jonathan Rinzler for braving new territory with us; Howard Roffman for an enjoyable evening discussion on the nature of Sith evil
